ABSTRACT

This report presents detailed social and economic statistics for the population of the United States below the poverty level in 1975. The statistics are based on the March 1976 Current Population Survey (CPS). They appear in tabular form. In addition, for comparability with 1975 estimates, revised 1974 data are shown in the historical tables that contain data on the changing characteristics of the low income population since 1959, the first year for which such data are available. The data are presented by selected characteristics such as race, family status, residence, education, work experience, and type and source of income. This year, additional data are shown for the elderly and for persons of Spanish origin. For the first time data on tenure, work experience and presence of children, duration of unemployment and ratio of family income to the poverty levels are included. (Author/AM)

ACKNOWLEDGMENTS

This report was prepared by **Renée H. Miller** under the general direction of **Roger A. Herriot,** Chief of the Family and Individual Income Statistics Branch and **Arno I. Winard,** Staff Assistant for Poverty Statistics. **Thelma Varhach, Thomas J. Meerholz, Zelda Silverstein** and **John O'Connor** of the Demographic Surveys Division were responsible for programming the persons and family tables. Review of the tables was provided by **Pauline Koustenis, Millie Baldea, Bruce Klein** and **Vivian M. Simmons.** Statistical review and significance testing was performed by **Christina O. Gibson** and **Margy Schooley** of the Statistical Methods Division. The historical tables were programmed by **Cheryl M. Marshall** with the assistance of **Emmett F. Spiers.** General review was provided by **Murray S. Weitzman,** Assistant Division Chief (Socioeconomic Statistics Programs), Population Division.

SUGGESTED CITATION

Persons

Table — Page

7. Ratio of income to poverty level in 1975—Persons by family status, sex of head, and race . . . 35
8. Farm-nonfarm residence and region—Persons by poverty status in 1975, family status, sex of head, and race . . . 37
9. Metropolitan-nonmetropolitan and poverty area residence by region—Persons by poverty status in 1975, family status, sex of head, and race . . . 41
10. Ten Federal regions—All persons and related children 5 to 17 years old by poverty status in 1975 and race . . . 54
11. Age and sex—Persons by poverty status in 1975, sex of head, family relationship, and race . . . 55
12. Children under 3 years old per 1,000 women—Women 15 to 44 years old and children under 3 years old by poverty status in 1975, metropolitan-nonmetropolitan residence, poverty area residence, and race . . . 58
13. Educational attainment—Persons 14 years old and over by poverty status in 1975, age, sex, and race . . . 59
14. Work experience—Persons 14 years old and over by poverty status in 1975, age, sex, and race . . . 64
15. Selected characteristics of the aged—Persons 60 years old and over by poverty status in 1975, age, and sex . . . 76
16. Standard errors for selected characteristics of persons below the poverty level in 1975 . . . 82

Families

17. Size of family—Families by poverty status in 1975 and sex and race of head . . . 83
18. Number of related children under 18 years old—Families by poverty status in 1975 and sex and race of head . . . 84
19. Children by size of family—Related children under 18 years old by poverty status in 1975 and sex and race of head . . . 85
20. Presence and age of related children—Families by poverty status in 1975 and age, sex, and race of head . . . 86
21. Marital status—Family heads and unrelated individuals 15 years old and over by poverty status in 1975, sex, age, and race . . . 89
22. Living arrangements—Unrelated individuals by poverty status in 1975, age, sex, and race . . . 93
23. Mobility status between March 1975 and March 1976—Family heads and unrelated individuals by poverty status in 1975, sex, and race . . . 95
24. Tenure by selected characteristics—Primary families and primary unrelated individuals by poverty status in 1975 and race of head . . . 98
25. Employment status of head in March 1976—Families and unrelated individuals by poverty status in 1975 and sex and race of head . . . 104
26. Number of workers—Families by poverty status in 1975 and sex and race of head . . . 105
27. Work experience of head by presence of children—Family heads by poverty status in 1975, sex, and race . . . 108
28. Work experience of unrelated individuals—Unrelated individuals by poverty status in 1975, sex, and race . . . 116
29. Family members by work experience of head—Persons in families by poverty status in 1975 and sex of head and race . . . 119
30. Occupation of longest job and class of worker—Civilian family heads and unrelated individuals who worked last year by poverty status in 1975, sex, and race . . . 120
31. Working mothers—Women with own children under 18 years old by poverty status in 1975, work experience, age of children, type of family or subfamily, and race . . . 123
32. Own children by work experience of mother—Own children under 18 years old by poverty status in 1975, age, type of family or subfamily and work experience and race of mother . . . 127
33. Educational attainment—Poverty status in 1975 of family heads 25 years old and over by race and sex and unrelated individuals 25 years old and over by race . . . 132
34. Total money income of families—Families below the poverty level in 1975 by presence of related children under 18 years old and age, sex, race, and Spanish origin of head . . . 133
35. Total money income of unrelated individuals—Unrelated individuals below the poverty level in 1975 by age, sex, race, and Spanish origin . . . 136
36. Total money income by size of family—Families and related children under 18 years old below the poverty level in 1975 and sex and race of head . . . 138
37. Source of income—Families and unrelated individuals by poverty status in 1975 and age, sex, and race of head . . . 141
38. Type of income—Families and unrelated individuals by poverty status in 1975 and age, sex, and race of head . . . 149
39. Size of income deficit—Families and unrelated individuals below the poverty level in 1975, presence of related children, sex, and race of head . . . 164
40. Standard errors for selected characteristics of families below the poverty level in 1975 . . . 165
41. Poverty area residence by selected characteristics—Families by poverty status in 1975, metropolitan-nonmetropolitan residence, and race of head . . . 166

CHARACTERISTICS OF THE POPULATION BELOW THE POVERTY LEVEL: 1975

NOTE

In processing the data collected in the March 1976 Current Population Survey, the Bureau of the Census utilized a new computer processing system designed to take maximum advantage of the Bureau's expanded computer capabilities. The revised system also incorporates many improvements in the procedures used to process the data. A detailed discussion of these improvements and the subsequent revisions to the 1974 poverty data (for comparability with 1975 data) is provided in a later section, entitled "Revised 1974 Money Income and Poverty Statistics."

This report presents detailed social and economic statistics for the population of the United States below the poverty level in 1975 based on the March 1976 Current Population Survey (CPS). In addition, for comparability with 1975 estimates, revised 1974 data are shown in the historical tables that contain data on the changing characteristics of the low-income population since 1959, the first year for which such data are available.

As in previous poverty reports, data are presented by selected characteristics such as race, family status, residence, education, work experience, and type and source of income. This year additional data are shown for the elderly and for persons of Spanish origin. For the first time data on tenure, work experience and presence of children, duration of unemployment and ratio of family income to the poverty level are included. Since the format of this report differs from that of previous reports, a list of the tables in this report and the corresponding table number in the previous final report (Series P-60, No. 102) is shown in table D. See section entitled, "New Data on Poverty" for more detail.

In this text, the terms "poverty," "low-income," and "poor" are used interchangeably. The poverty threshold for a nonfarm family of four persons was $5,500 in 1975, about 9 percent higher than the comparable 1974 cutoff of $5,038. The poverty thresholds are updated every year to reflect changes in the annual average Consumer Price Index (CPI). See page 195 for a detailed explanation of the poverty concept.

HIGHLIGHTS

There were 25.9 million persons below the poverty level in 1975, comprising 12 percent of all persons.[1] Between 1974 and 1975 the number of persons below the low-income level increased by 2.5 million or 10.7 percent, reflecting the continued inflation and sluggishness in the economy. For example, during this period the poverty thresholds increased 9.1 percent reflecting the changes in consumer prices, whereas personal income per capita increased only 7.5 percent.[2] In addition, the average annual unemployment rate rose from 5.6 percent to 8.5 percent[3] and the number of persons who exhausted their unemployment benefits increased from 2.0 million in 1974 to 4.3 million in 1975.[4]

---

[1] This is somewhat higher than the 23,991,000 estimated from a special study, Survey of Income and Education, which was taken at about the same time. See page 12 for additional details.

1975...........	25,877	*2,507	*10.7

*Figure is significantly different from preceding figure at the 95 percent confidence level.

[r]Based on revised methodology; see page 204 for details on 1966 and page 6 for details on 1974. The difference shown is the difference from the unrevised estimate.

The increase of 2.5 million low-income persons during the 1974-1975 period was the largest single year increase observed since 1959, the first year for which poverty data were available (table A). In fact, there were only two other single year periods since 1959 in which the number of persons below the poverty level increased: 1969-1970 and 1973-1974. Each of these increases represented about 1.3 million persons.

Between 1974 and 1975, the increase in the number of persons below the poverty level was quite pervasive, occurring for both Black and White persons, for persons of Spanish origin, and for the young as well as for the elderly.[5] Particularly large percentage increases were observed for Whites, persons under 65 years, and husband-wife families. Table B summarizes these changes by race, age and family status. As shown in the table:

- White persons increased by 2.0 million or 13 percent; Blacks increased by about 363,000 or 5 percent. Persons of Spanish origin increased by 16 percent; however, because of the small sample size for this group it cannot be reliably determined whether this increase was greater than the increase noted above for Whites and Blacks. In 1975, the poverty rates for Blacks and persons of Spanish origin were considerably higher than those for Whites (31 percent, 27 percent, and 10 percent, respectively), as shown in table 1.

- There was an 11 percent increase in the number of poor persons under 65 years. The data also indicate an increase for poor persons 65 years and over but because of the relatively large sampling variability on the estimate for this group, this statement is made at a lower confidence level than the other statements in this report. In 1975, the poverty rate for persons 65 years and over was 15 percent compared to 12 percent for those under 65 years (table 8). There was no significant change in the poverty rate for persons 65 years and over between 1974 and 1975.

- The number of families in poverty increased by 10.7 percent, from 4.9 million in 1974 to 5.5 million in 1975. The increase in the number of poor families occurred mainly among husband-wife families (table B). These families increased by 17 percent (from 2.5 to 2.9 million) while poor families with a female head, no husband present, increased by only 5 percent (from 2.3 to 2.4 million).[6]

- The number of unrelated individuals (persons living alone or with nonrelatives) below the poverty level increased by 12 percent, from 4.6 million to 5.1 million. Table B indicates a rate of increase of 14 percent for low-income female unrelated individuals, while for low-income male unrelated individuals, the increase was 8 percent. However, the apparent difference between these two rates of increase is not statistically significant.

---

[5] The increase in the number of poor persons 65 years and over was significant at the 90 percent confidence level. Unless otherwise qualified, all other comparisons are significant at the 95 percent confidence level.

[6] The increase for poor families with a female head was significant at the 93 percent confidence level.

Table B. Selected Characteristics of Persons, Families and Unrelated Individuals Below the Poverty Level in 1974 (Revised) and 1975

(Numbers in thousands. Persons, families and unrelated individuals as of March of the following year)

Characteristics	1975		1974[r]	Change	
	Number	Standard error	Number	Number	Percent
All persons	25,877	373	23,370	*2,507	*10.7
Spanish origin	2,991	162	2,575	*416	*16.2

*1975 figure is significantly different from the 1974 figure at the 95 percent confidence level.

[r] Based on revised methodology; for details see section entitled, "Revised 1974 Money Income and Poverty Statistics."

Work Experience and Duration of Unemployment

Generally there is not a very high degree of correspondence between the unemployed and the poor because of the high turnover rate among the unemployed and because the majority of jobless workers receive some income from unemployment compensation.[7] As would be expected, however, there is more of an overlap for families in which the head was unemployed for a long period of time (15 weeks or more) than for families in which the head was only unemployed for a short period of time. This is because unemployment compensation does not entirely replace earnings and because as the length of unemployment increases, there is the possibility of exhausting unemployment benefits.

Between 1974 and 1975, there was an increase in the total number of families with a head who was "unemployed 15 weeks or more,"[8] from 2.2 million to 3.5 million. Moreover, there was an increase in the number of persons who exhausted their unemployment benefits from 2.0 million in 1974 to 4.3

---

[7] **The Measure of Poverty, A Report to Congress as Mandated by Education Amendments of 1974,** prepared by a Poverty Studies Task Force under the auspices of the Department of Health, Education, and Welfare and a Supplementary Working Paper by Robert Stein, BLS, "Relationship Between Poverty Measures and Unemployment Measures at the National Level."

[8] Data for family heads who were "unemployed 15 weeks or more" consist of two groups (1) those who worked for part of the year and were looking for work or on layoff from a job 15 weeks or more during the year and (2) those who did not work during the entire year and gave as the main reason that they could not find work. This definition is not entirely comparable to the definition used by the Bureau of Labor Statistics which specifies strict job seeking requirements.

million in 1975. During the same period, the number of low-income families with a head "unemployed 15 weeks or more" increased by 223,000 or 37 percent. As shown in table C, this increase of 223,000 families represented about 42 percent of the 528,000 net increase in the number of families below the poverty level between 1974 and 1975.

Most of the remainder of the total increase in poverty between 1974 and 1975 was accounted for by families in which the head was "not available" for work during the entire year and gave "Ill or disabled," "Keeping house," or "Retired" as the main reason for not working. The number of poor families in these three categories combined increased by 260,000 or 12.5 percent between 1974 and 1975 (table C).

These are some of the highlights obtained from the Consumer Income Supplement conducted in March 1976 in connection with the Bureau's monthly Current Population Survey (CPS). The information was collected from a sample of persons representing: (1) the civilian noninstitutional population, and (2) members of the Armed Forces living off post or with their families on post in the United States. Unrelated individuals under 14 years of age are excluded from this report.

The poverty definition used in this report is based on an index developed at the Social Security Administration (SSA) in 1964, and revised by a Federal Interagency Committee in 1969. A directive from the Bureau of the Budget (described in the September 1969 Statistical Reporter) established the Census Bureau statistics on poverty as the standard data series to be used by all Federal agencies.

The poverty concept is a statistical yardstick based on the Department of Agriculture's 1961 Economy food plan and reflects the different consumption requirements of families in relation to

Table C. Work Experience and Duration of Unemployment of Family Heads by Poverty Status in 1974 (Revised) and 1975

(Numbers in thousands. Families as of March of the following year)

Work experience of head	All income levels			Below poverty level		
	1975	1974^r	Difference	1975	1974^r	Difference
All families	56,245	55,698	*547	5,450	4,922	*528
Head "unemployed 15 weeks or more"[1]	3,508	2,195	*1,313	833	610	*223
Worked some time during the year, unemployed 15 weeks or more	3,009	1,946	*1,063	618	470	*148
Did not work, unable to find work	499	249	*250	215	140	*75

^{r}Based on revised methodology; for details see section entitled, "Revised 1974 Money Income and Poverty Statistics."

[1] See footnote 8 of the text for explanation.

[2] Includes all family heads who worked either the entire year or were unemployed for less than 15 weeks; heads who did not work and gave as the main reason "going to school" and "other;" and heads in Armed Forces.

their size and composition, sex and age of the family head, and farm-nonfarm residence. A food-to-income ratio of one-third for families of three or more, based on the Department of Agriculture's 1955 Survey of Food Consumption, was used to derive the poverty thresholds from the economy food plan.[9]

When analyzing CPS data on the low-income population, it is important to keep in mind that these data are based on a sample survey (47,000 households) and are therefore subject to sampling variability. An explanation of sampling variability is found in the section entitled, "Source and Reliability of the Estimates" and tables 10, 16, and 40 show examples of standard errors.

Data on income collected in the CPS are limited to money income received before payments for personal income taxes and deductions for Social Security, union dues, Medicare, etc. Money income is the sum of the amounts received from earnings; Social Security and public assistance payments; dividends, interest, and rent; unemployment and workmen's compensation; government and private employee pensions; and other periodic income. Certain money receipts such as capital gains are not included. Therefore, money income does not reflect the fact that many families receive part of their income in the form of nonmoney transfers such as food stamps, health benefits, and subsidized housing; that many farm families receive nonmoney income in the form of rent-free housing and goods produced and consumed on the farm; or that nonmoney incomes are also received by some nonfarm residents such as the use of business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc. These elements should be considered when comparing income levels. In addition, it should be noted that nonmoney income is not considered in calculating the poverty thresholds. Recently, however, receipts from nonmoney transfers such as food stamps have become an increasingly important element in the income of low-income persons.[10] Data from the April 1975 CPS indicate that about 40 percent of all poor families participated in the food stamp program.[11]

Moreover, readers should be aware that for many different reasons, there is a tendency in household surveys for respondents to underreport their income. Underreporting tends to be more pronounced for income sources that are not derived from earnings, such as Social Security, public assistance, unemployment compensation and net income from interest, dividends, rentals, etc. Overall, income earned from wages or salary is more accurately reported than other sources of income. After editing and allocation of missing amounts, wages and salaries in the survey accounted for approximately 97 percent of independently derived administrative sources. By contrast, 1975 income data on Social Security and public assistance payments to beneficiaries amounted to approximately 91 and 77 percent, respectively, of independently derived estimates. For further details, see page 195.

A study which attempts to adjust the CPS data for underreporting and to impute government "in-kind" transfer program benefits, such as food stamps, Medicare, and subsidized housing to families in the survey, has recently been completed by the Congressional Budget Office (CBO).[12] Statistical techniques were used to simulate eligibility and participation of persons in the various programs. For simulated participants, the services received were given a money "value" based on the assumption that the value of these services to the beneficiaries is equal, on the average, to the government's cost.

The CBO report represents one attempt to measure and study the effects of adjusting for underreporting of money income and the inclusion of nonmoney transfer payments, on the size distribution of income and poverty counts. Although, the procedures used by the CBO provide one approach, there continues to be a general lack of agreement of how to measure and value in-kind income. The interested reader may wish to consult a recent report by a governmental interagency task force which discusses many of these issues.[13]

The poverty counts presented in the CBO report are not entirely comparable to those presented in this report because the institutionalized population, members of the Armed Forces living in group quarters, and the population of Puerto Rico are included in the CBO report but are excluded from the estimates presented here. In addition, the reference period for the CBO estimates and the poverty threshold levels were adjusted to cover fiscal year 1976 rather than calendar year 1975.

[13] The Measure of Poverty, A Report to Congress as Mandated by the Education Amendments of 1974, and in particular, see Technical Paper VII, "In-Kind Income and the Measurement of Poverty," prepared by Janice Peskin, U.S. Department of Health, Education, and Welfare.

It also should be noted that the poverty threshold levels used in this Census report correspond to a measure of income adequacy which was originally developed as a relative measure based on money income.[14] Whether this measure also would serve as a measure of income adequacy for an income distribution which includes nonmoney as well as money income as in the CBO report, is an issue which deserves attention.[15]

NEW DATA ON POVERTY

As a result of the changes introduced into the processing system, the Bureau expanded the detail of its tabulations on poverty. Table D presents a listing of all of the tables in this report along with the corresponding tables published in the previous final poverty report (Series P-60, No. 102). The following is a summary of the new data available in this report along with some definitions and limitations.

1. **Persons of Spanish Origin.** Data for persons of Spanish origin below the poverty level and below 125 percent of the poverty level from 1972 to 1975 are shown in tables 1 and 2 respectively. Caution must be used in making year to year comparisons, however, because of the large sampling variability associated with these estimates. In addition, the revised 1974 and 1975 data are not strictly comparable to the figures for the earlier years. For more details see the section entitled, "Revised 1974 Money Income and Poverty Statistics." Tables 42 and 43 show residence data and data on selected characteristics for persons and families by type of Spanish origin (Mexican and Puerto Rican) and poverty status in 1975.

2. **The Elderly.** Table 3 shows data for persons 65 years and over below the poverty level in 1959 and 1966 to 1975 by family status and sex and race. Table 15 presents 1975 poverty data for persons 60 years and over in different age categories by residence, marital status, work experience, source and type of income and tenure and living arrangements.

3. **Ratio of Family Income to Poverty Level.** Table 7 shows persons by family status classified by the ratio of the family income to the poverty level in 1975. This table can be used to determine the number of persons below multiples of the poverty level (for example .75, 1.25, 1.50, 1.75 and 2.00).

4. **Selected Characteristics of Families by Metropolitan-Nonmetropolitan Residence and Residence in Poverty Areas.** (Table 41) Caution must be used in analyzing data on poverty areas because the areas are defined in terms of the prevalence of poverty at the time of the 1970 census. See page 192 for more details.

5. **Standard Errors.** Tables 16 and 40 present standard errors for selected characteristics of persons and families below the poverty level in 1975.

6. **Tenure.** Table 24 shows selected characteristics of primary families and unrelated individuals by tenure (owner vs. renter) and poverty status in 1975. Data on subsidized housing are included. Tables 15, 41, and 43 also include data on tenure.

7. **Work Experience by Presence of Children.** Data for families by presence of children under 6 and under 18 years are shown in table 27. This table also includes data on duration of unemployment for those family heads who worked less than 50 weeks in 1975.

The entire set of tables shown in this report has also been tabulated for those below 125 percent of the poverty level in 1975. In addition, the contents of the tabulations originally prepared for the Office of Economic Opportunity (OEO tables) and now being supported by the Office of Assistant Secretary for Planning and Evaluation, Department of Health, Education, and Welfare are outlined in Appendix B. These tabulations contain more detailed cross-classifications by age than are shown in the tables presented in this report. Requests for these unpublished data, along with a specific description of the figures desired, should be addressed to the Chief, Population Division, Bureau of the Census, Washington, D.C. 20233.

REVISED 1974 MONEY INCOME AND POVERTY STATISTICS

In addition to the 1975 data on poverty, this report also presents revised data for 1974, resulting from changes in processing and other factors as described below. These changes were made in an effort to reduce the nonsampling error in the estimates (i.e., certain response, enumeration, and processing errors); the differences between the original and revised 1974 estimates are due entirely to changes in

the magnitude of the nonsampling error associated with the statistics. Overall, the revisions to the 1974 data resulted in an increase of $66 in the estimate of median family income (from $12,836 to $12,902) and a decrease of 890,000 in the estimate of the number of persons in poverty (from 24.3 to 23.4 million). These differences, as well as the differences discussed in the following sections, are due to one or more of the following four factors: 1) changes in procedures which impute missing responses to the income and work experience questions on the March CPS questionnaire, 2) changes in the March CPS income and work experience questions, 3) changes in the number and detail of tabulated income intervals, and 4) the correction of several small errors found in the previous processing system.

Changes in Imputation Procedures

As in all household surveys which rely on the voluntary cooperation of the respondents in the sample, one of the more persistent problems encountered on the March CPS supplement has been a need to minimize bias resulting from nonresponses (complete or partial failure to obtain information requested on the questionnaire from respondents). In 1962, the Census Bureau began imputing missing responses to the income, work experience, and longest job questions on the March CPS supplement questionnaire in an effort to reduce the bias resulting from nonresponses. This bias results from the fact that nonrespondents tend to have somewhat different economic and demographic characteristics than respondents. For example, nonrespondents tend to have higher than average incomes, are classified in higher skilled occupations, and are more likely to work at full-time jobs. In addition, nonresponse varies by type of income and, therefore, may bias statistics for the lower end of the income distribution (where transfer payments are concentrated) and the upper end (where earned and property income are concentrated).

Since 1962, two major revisions have been made to the income, work experience, and longest job imputation procedures, the first in 1967 and the second, being discussed here, in 1976. In both 1967 and 1976, the revisions coincided with large scale changes in computer facilities at the Census Bureau and revisions to the March CPS supplement questionnaire. Although the imputation procedures have been updated twice since 1962, with revisions to the income data occurring each time, the basic strategy or approach used to make imputations has remained the same. This approach, commonly referred to as "hot deck" imputation, assigns to a sample person with missing responses the information from another sample person with "similar" demographic and economic characteristics who answered the questions.

The following is a simplified illustration of how the "hot deck" imputation system provides estimates for a person who did not respond to a specific income question on the CPS questionnaire:

> A white male, age 38, who worked 52 weeks in 1975 as a carpenter refuses to provide the CPS interviewer with the amount of wages he earned during 1975. The imputation system is designed to seek out another person in the survey who is a white male, age between 35 and 44, who worked 50 to 52 weeks in 1975 as a carpenter and who reported his wages to the interviewer. If his wages in 1975 were $12,000, for example, that value is then assigned as the wages for the person who declined to answer.[16]

The decision to make the current revisions to the imputation procedure was based on several considerations. First, the upgrading of the Bureau's computer facilities, while increasing the capacity to handle more information more efficiently, required modification of existing processing procedures. Second, changes in the Federal transfer payment programs necessitated changes in the questionnaire and processing procedures. Finally, there existed a pressing need to improve the handling of income nonresponses because it had become a large and growing problem.[17]

There were two main objectives in the revisions of the imputation procedures for income, work experience, and longest job. The first objective was to expand the detail and number of demographic and economic characteristics used to define respondents and nonrespondents as "similar." Since nonrespondents are assigned information from respondents with "similar" characteristics, the degree of bias due to nonresponse may be reduced by incorporating more detailed information in the imputation procedures. The second objective was to maintain—wherever possible—observed relationships for respondents among income, work experience, and longest job variables in imputing missing information for nonrespondents.

Among the major changes instituted in expanding the number of demographic and economic characteristics to define nonrespondents and respondents as "similar" are the following:

a. Worker-nonworker status (for previous calendar year) is imputed using current labor force information for the respondent (pertaining to the week in March prior to the CPS interview), current labor force status of spouse, number of children, and more detailed age and family relationship information, when sufficient information is not available from the March supplement questionnaire to determine the worker-nonworker status. Characteristics used in the previous imputation system were restricted to age, race, sex, and family relationship (head/not head).

b. Assignment of missing longest job information is made from the current job held if the current job is available. The previous procedure imputed a longest job using age and sex to define "similar" persons.

c. Missing earnings, work experience (weeks worked, full-time/part-time status, etc.), and longest job (if not assigned from current job) are imputed using a greater number of demographic and economic characteristics than previously. These added characteristics include educational attainment, labor force status of spouse, marital status, number of children, region, and type of residence (e.g., inside metropolitan areas of 1,000,000 population or more, farm residence, etc.). Characteristics used in the previous imputation system but expanded to provide more detail in the new system include age, family relationship, occupation of longest job, class of worker of longest job, weeks worked, full-time/part-time work status, and race-ethnic origin (Spanish origin included).

---

[16] In actuality, the imputation system attempts to locate a "similar" person in the survey using a more detailed set of characteristics (which are described later) than those used in the example. The example is intended to be an illustration of how the "hot deck" approach operates.

[17] For a more detailed discussion of nonresponse research and efforts to reduce nonresponse, see a paper entitled, "Current Developments on Collecting Income Data in the Current Population Survey," by Mitsuo Ono, American Statistical Association, Proceedings of the Social Statistics Section, 1971. For a discussion of the characteristics of nonrespondents, see a paper entitled, "Characteristics of Income Nonrespondents in the Current Population Survey," by Emmett Spiers, John Coder, and Mitsuo Ono, also in Proceedings of the Social Statistics Section, 1971.

d. Expanded detail and numbers of characteristics were also used for the imputation of the "unearned" sources of income such as Social Security benefits, public assistance, unemployment compensation, dividends, etc. Characteristics added for use in the new imputation system for "unearned" income include years of school completed, weeks worked, reason for not working (nonworkers), marital status, number of children, total family earnings, region, type of residence, and, when available, the reported recipiency pattern for the "unearned" sources of income. Characteristics used in the previous imputation system but expanded to more detail in the new one include age, family relationship, amount of earnings, and race-ethnic origin (Spanish origin included).

To achieve the second objective (the preservation of relationships among income, work experience, and longest job categories), the imputation system was designed to impute all missing information to a nonrespondent from the same "similar" respondent. The addition of current labor force information and for married persons—current labor force status of spouse, also helps to preserve relationships between "current" labor force status and job and "last year's" work experience, longest job, and earnings for individuals within the family. The previous procedure imputed missing work experience, longest job, earnings, and unearned income in separate stages. Although the revised procedure attempts to impute earnings, work experience and longest job in a single stage, a second stage is still required to impute the "unearned" sources. Several revisions were made to the imputation procedure to help preserve the distribution of "unearned" income sources for individuals. First, the reported recipiency pattern for "unearned" income is always used—when available—to impute missing dollar amounts. Second, husbands and wives are imputed missing "unearned" income information as a unit in order to prevent inconsistencies between the amounts and sources imputed to either the husband and/or wife.

In addition to the changes in the imputation procedures, two other factors are involved in explaining differences in the 1974 poverty statistics produced by the old and new processing systems. These are: (1) differences due to additional income questions asked in the March 1975 CPS, and (2) the existence of errors in the old processing system which have been eliminated in the new system.

Differences Due to Additional Income Questions

The March 1975 CPS questionnaire was expanded to a total of 11 questions on income for 1974, two more than on the March 1974 CPS questionnaire. This expansion involved: (1) addition of a separate question covering "interest on savings accounts or bonds" which was previously included in amounts collected for dividends, estates or trusts, and net rental income, and (2) addition of a separate question on Supplemental Security Income (SSI), a program which began in January 1974.

Even though the questionnaire format changed in March 1975, the old processing system was used to process the income data originally published for 1974 because the new processing system was not available at the time the data were processed. Using the old system to process data collected with the new questionnaire required that the new questions be collapsed into the old procedure. In some cases a question requiring imputation was combined with a question not requiring imputation, thus, eliminating an imputation that would have occurred in the new system. As a result, the new system imputed additional income amounts and shows a slightly higher nonresponse rate.

Errors in the Old Processing System

In reconciling the two sets of statistics, two important errors were discovered in the old processing system. One error was the result of changes to the old programs in recent years to accommodate modifications to the questionnaire and field collection procedures. This error involved a misclassification of about 2.6 million part-year workers as full-year (50-52 weeks) workers. This difference was the result of three interrelated factors: (a) change in the questionnaire format for the work experience questions from those used in the previous year, i.e., March 1974 CPS, (b) interviewer errors in following the skip pattern on the March 1975 CPS questionnaire, and (c) a work experience edit which in interaction with interviewer errors, resulted in part-year workers being classified as full-year workers.

Since the majority of persons previously erroneously edited from "1 to 49 weeks worked" to "50 to 52 weeks worked" reported their income, neither their income nor their poverty status were affected by the new edit. There was, however, some impact on income and poverty levels resulting from income allocations made to and from these edited persons.

It is estimated that the correction of this error resulted in a net decrease in the poverty count for 1974 by about 50,000 persons.

The second error resulted in the failure to assign dollar amounts to some respondents who indicated that they received particular types of "other income" but didn't know the amount of the income they received. All such sample cases should have been allocated a dollar amount of income under these conditions. This error affected about 600,000 persons (or 385 sample cases) in the March 1975 CPS. One of the most significant impacts of this error was that the dollar amounts allocated to these individuals in the new system were responsible for moving at least 200,000 persons out of poverty for 1974.

Comparison of Statistics from the Old and New Systems

Although the introduction of the new processing system produced changes in the statistics for all groups, both high and low income, it is the changes in the poverty statistics which are the most salient. The estimated number of poor persons for 1974 was about 890,000 (or 3.7 percent) lower in the new system than in the old system. (See table E). Technically, a net change of this magnitude, particularly when 250,000 of the decrease was the result of correction of errors in the old system, is not large. It might be noted that changes in the allocation procedures associated with the introduction of the previous processing system in 1967 resulted in a drop in the estimated number of persons in poverty by almost 2 million in 1966.

Overall about 10,700 sample families and unrelated individuals (out of a total of 47,800) required at least one income allocation. Of this number, 1,375 units, or about 13 percent changed their poverty status using the new processing system (831 moved above the poverty line and 544 fell below the poverty line). The net change of about 287 sample families and unrelated individuals is not very large considering the processing changes that have been introduced.

As a result of the redesign of the imputation procedures and the correction of the errors in the old processing system, the estimated number of poor persons declined from 24.3 million to 23.4 million in 1974. The number of Whites and Blacks in poverty declined at about the same rate (3.7 percent) whereas little change was noted for persons of Spanish origin.

Persons 65 years and over showed more of a decline than persons of younger age groups (6.7 percent compared to 3.6 percent for persons 14 to 64 years and 2.5 percent for those under 14 years). Poor families with a male head declined by 5.8 percent whereas little change was noted for those with

Table E. Comparison of Families and Persons Below the Poverty Level in 1974, Before and After Revision of the Processing System

(Numbers in thousands. Persons and families as of March 1975)

2.00 or more	141,139	139,954	1,185	0.8

[r] Based on revised methodology; for details see section entitled, "Revised 1974 Money Income and Poverty Statistics."

Z Less than 0.05 percent.

[1] For unrelated individuals, income of the individual.

a female head. Among unrelated individuals, decreases were noted for both males and females, with females decreasing more than males (6.4 percent compared to 3.7 percent). (Table E). Very large decreases were observed for the following groups, persons in families with a head who worked year round full-time (-14.0 percent), unrelated individuals who worked year-round full-time (-36.6 percent), persons in families with a head who completed 1 year or more of college (-15.3 percent) and unrelated individuals who completed 1 year or more of college (-15.4 percent). The net decline for persons below 75 percent of the poverty level was larger than that for the remainder of the poor (-4.9 percent compared to -1.8 percent). (Table F).

When one broadens the scope of the investigation to look at the entire income distribution, less pronounced differences are found although sizeable changes do occur for some small groups. Overall, the median family income for 1974 increased by $66 or about 0.5 percent compared to the previous estimates, however, the impact of the new edit and allocation procedures is more clearly discerned by comparing mean incomes under the old and new processing systems rather than median incomes. The differences in median incomes under the two systems are due not only to the new edit and allocation procedures, but also to interpolation differences and hence are often not strictly comparable.

The mean family income for 1974 rose from $14,502 in the old system to $14,711 in the new system, an increase of $209 or 1.4 percent. The percentage increase in mean incomes for both Black and White families was the same, 1.4 percent. In contrast, families whose head was of Spanish origin now have a mean income which is 0.5 percent below the previously published estimate.

The revised procedures and the correction of the previously discussed error in the determination of year-round full-time work experience resulted in a decrease in the estimate of year-round rull-time workers by about 2 million (1,043 thousand females and 984 thousand males). The effect on the mean income of this group was to raise the estimate for females to $7,684 or $273 above the previous estimate and to increase the estimate for year-round full-time male workers by $393 to $13,757 for 1974. For more details on the impact of the revised procedures on the income distribution, see Current Population Reports, Series P-60, No. 105.

In summary, the revised money income and poverty estimates for 1974 reflect the use of more refined imputation procedures in the current system and the correction of editing errors in the previous processing system. The revised 1974 estimates show the largest increases in mean income for groups which were most heavily affected by the new procedural changes, such as families with a head who had four or more years of college or those where the head was in a self-employed occupation. Similarly, the largest declines in the number of poor persons occurred for the expected groups, such as poor persons in families with a head who worked year-round full-time or those in families with a head who completed one year or more of college.

Current Population Survey Reports. A detailed explanation of the poverty concept appears in **Current Population Reports,** Series P-23, No. 28, "Revision in Poverty Statistics, 1959 to 1968" and in **The Measure of Poverty, A Report to Congress as Mandated by the Education Amendments of 1974,** prepared by a Poverty Studies Task Force under the auspices of the Department of Health, Education, and Welfare. This report also discusses limitations of the current poverty definition and presents alternative methods for measuring poverty.

A detailed description of the original poverty index developed by the Social Security Administration appears in the following articles by Mollie Orshansky published in the **Social Security Bulletin:** "Counting the Poor: Another Look at the Poverty Profile," January 1965, and in "Who's Who Among the Poor: A Demographic View of Poverty," July 1965.

Data on poverty based on the original poverty definition appear in **Current Population Reports,** Series P-60, No. 54, "The Extent of Poverty in the United States: 1959 to 1966." Comprehensive data and analysis of poor persons and families based on the revised definition of poverty appear in Series P-60, No. 68, "Poverty in the United States, 1959 to 1968;" P-60, No. 76; "24 MILLION AMERICANS, Poverty in the United States: 1969;" P-60, No. 81, "Characteristics of the Low-Income Population: 1970;" P-60, No. 86, "Characteristics of the Low-Income Population: 1971;" P-60, No. 91, "Characteristics of the Low-Income Population: 1972," P-60, No. 95, "Supplementary Report on the Low-Income Population: 1966 to 1972" P-60, No. 98, "Characteristics of the Low-Income Population: 1973," and P-60, No. 102, "Characteristics of the Population Below the Poverty Level: 1974." Data based on the Current Population Survey showing the distribution of families and persons, by income levels, appear in the other P-60 reports, the latest of which is P-60, No. 105, "Money Income in 1975 of Families and Persons in the United States."

Advance data on the low-income population in 1975 cross-classified by selected characteristics appear in **Current Population Reports,** Series P-60, No. 103, "Money Income and Poverty Status of Families and Persons in the United States: 1975 and 1974 Revisions."

A summary of the changes in the composition of the low-income population since 1959 and the limitations of the data used to quantify poverty are presented in "Trends and Composition of the Low-Income Population," by Renee Miller and Arno Winard, **Proceedings of the Social Statistics Section,** American Statistical Association, 1974.

An analysis of the characteristics of food stamp households appears in **Current Population Reports,** Series P-23, No. 61, "Characteristics of Households Purchasing Food Stamps."

Office of Economic Opportunity Tabulations. The contents of the tabulations originally prepared for the Office of Economic Opportunity (OEO tables) are outlined in appendix B. These tabulations contain more detailed cross-classifications by age than are shown in the tables presented in this report.

Survey of Income and Education

Preliminary estimates by state of the number of persons and school age children below the poverty level in 1975 from the Survey of Income and Education (SIE) have been released to Congress. The SIE was a special survey of approximately 151,000 interviewed households that the Bureau of the Census conducted in each State between April and July 1976 in accordance with the Education Amendments of 1974. Additional data will be available in forthcoming subject reports prepared by the Bureau of the Census.

Data on poverty for calendar year 1975 from the SIE differ somewhat from those based on the CPS. In general, the estimates of the number of persons below the poverty level by various characteristics from the SIE are lower than those from the CPS.

For example, there were 23,991,000 persons below the poverty level in 1975 from the SIE compared to 25,877,000 from the CPS. For families, the figures were 5,051,000 and 5,450,000 respectively and for children 5 to 17 years old, the figures were 7,132,000 and 8,034,000 respectively. Although two major aspects of these surveys were the same, the money income concept and the questionnaire wording and design, there were some significant procedural differences which probably cause the income estimates in these surveys to differ. These differences center on four main areas: (1) Survey objectives (2) month of interview (3) conditioning of respondents and mode of interview, and (4) interviewer experience.

1. **Survey Objectives.** The major objective of the SIE was to collect accurate income information for each State and the District of Columbia. The primary purpose of the CPS is to obtain accurate statistics on the labor force; e.g., the unemployment rate with income information added as a supplement in March. Presumably the increased emphasis on collection of income data in the training of interviewers and the introductory letters to respondents led to better (i.e., more complete) reporting and thus contributed to differences in the results between the two surveys.

2. **Month of Interview.** Virtually all interviews in the March 1976 CPS were conducted during the week of March 14 to 20. Only a small number of households were interviewed during the succeeding week. The SIE interviews took place, for the most part, in May and June, with a small number of interviews occurring in April and July. Since respondents often consult their tax returns in answering survey questions on income, the fact that the CPS interviews took place before the general April 15 deadline for filing tax returns may have disadvantages compared to the SIE survey. On the other hand, collection of data in May, June, and July for the SIE may have created significant recall problems for income and work experience during 1975.

3. **Conditioning of Respondents.** It has been well documented that the repeated interviews of CPS sample households result in decreased respondent cooperation as the number of interviews increases. The SIE did not encounter these problems since all households were, in effect, being interviewed for the first time. In addition respondent cooperation to answer income questions is affected by the mode of interview. Interviewers tend to be able to secure more complete income information in a personal interview than a telephone interview. Whereas extensive use is made of the telephone interviews in the CPS, almost all of the SIE data were collected in personal interviews.

Preliminary analysis of the SIE data file indicates significantly lower nonresponse rates for income than those for the March 1976 CPS. Respondent conditioning and telephone interviews in the CPS are probably contibuting factors to the differing income nonresponse rates.

4. **Interviewer Experience.** It was necessary to hire a large number of new, temporary interviewers for the SIE. In contrast, the interviewers used for the CPS tend to be highly trained and experienced.

Decennial Census

Poverty data collected in the 1970 Census of Population appear in a number of published reports. Selected characteristics of persons, families, and unrelated individuals below the poverty level, for the United States, each of the States, counties, standard metropolitan statistical areas, urbanized areas, and urban places are presented in **1970 Census of Population,** Vol. I, **Characteristics of the Population,** chapter C, "General Social and Economic Characteristics." Statistics on poverty status in 1969 of persons and families by detailed characteristics, including cross-classifications by race, age, weeks worked, education, type of family, etc., are presented in **1970 Census of Population,** Vol. I, **Characteristics of the Population,** chapter D, "Detailed Characteristics," for some or all of the following areas: United States, each of the States, and standard metropolitan statistical areas of 250,000 inhabitants or more. Further information is contained in **Data Access Description** No. 29, Collection, Evaluation, and Processing Series CEP-7, "Low-Income Data from the 1970 census."

Cross-classifications of poverty status in 1969 for persons and families by detailed social, economic, and housing characteristics are presented in **1970 Census of Population,** Volume II Report PC(2)-9A, "Low-Income Population." Tables are generally for the United States, although some are repeated for regions and metropolitan-nonmetropolitan residence. Data on the social, economic, and housing characteristics of the low-income population residing in poverty areas in the 50 largest cities can be found in **1970 Census of Population,** Volume II Report PC(2)-9B, "Low-Income Areas in Large Cities," Supplementary Report PC(S1)-5, "Selected Characteristics of the Population in Low-Income Areas of Large Cities," and Supplementary Reports PC(S1)-65 to PC(S1)-103, "Low-Income Neighborhoods in Large Cities: 1970." Selected data on the poverty status in 1969 and 1959 of persons and families for the United States, each of the States, counties, standard metropolitan statistical areas (SMSA's), and central cities of large SMSA's appear in **1970 Census of Population,** Supplementary Report, PC(S1)-105, "Poverty Status in 1969 and 1959 of Persons and Families, for States, SMSA's, Central Cities, and Counties: 1970 and 1960."

Statistics on income in 1969 collected in the Current Population Survey of March 1970 differ from data for that year from the 1970 census despite the fact that the same basic concept was used in both instances. College students are generally enumerated at their own homes in the Current Population Survey and classified as family members, but were enumerated at their college residence in the census, usually as secondary individuals. In addition the small group of Current Population Survey interviewers was more experienced and had more intensive training and supervision than the large number of temporary census enumerators and may have more often obtained more accurate answers from respondents. Furthermore, approximately 60 percent of the households were self-enumerated in the 1970 census. Moreover, income data in the Current Population Survey are based on responses to separate questions on 11 types of income, as well as responses to additional yes-no circles within six of these questions, whereas in the census only 6 questions were used.

In general, the number of persons and families below the poverty level reported in the census is higher than that reported in the Current Population Survey. The number of poor persons in the 1970 census was 27.1 million compared to 24.1 million derived from the March 1970 Current Population Survey. The comparable figures for low-income families were 5.5 million and 5.0 million, respectively.

For a more detailed discussion of the overall income differences between the 1970 census and the Current Population Survey, see "Preliminary Evaluation of 1969 Money Income Data Collected in the 1970 Census of Population and Housing" by Mitsuo Ono, **American Statistical Association Proceedings of the Social Statistics Section,** 1972.

NOTE

In the past the Census Bureau has designated a head of household to serve as the central reference person for the collection and tabulation of data for individual members of the household (or family). However, recent social changes have resulted in a trend toward more equal status for all members of the household (or family), making the term "head" less relevant in the analysis of household and family data. As a result, the Bureau is currently developing new techniques of enumeration and data presentation which will eliminate the concept of "head." While much of the data in this report are based on the concept of "head," methodology for future Census Bureau reports will reflect a gradual movement away from this traditional practice.

[r] BASED ON REVISED METHODOLOGY. SEE SECTION ENTITLED, "REVISED 1974 MONEY INCOME AND POVERTY STATISTICS" FOR DETAILS.

[1] BEGINNING WITH THE MARCH 1970 CPS, DATA BASED ON 1970 CENSUS POPULATION CONTROLS; SEE TEXT FOR EXPLANATION.

[2] INCLUDES FAMILIES WITH CIVILIAN HEADS ONLY FOR 1974[r] AND 1975. IN ADDITION, FIGURES FOR 1974[r] AND 1975 ARE NOT STRICTLY COMPARABLE TO FIGURES FOR EARLIER YEARS BECAUSE UNPAID FAMILY WORKERS ARE INCLUDED IN THE 1974[r] AND 1975 FIGURES BUT ARE EXCLUDED FROM THE FIGURES FOR EARLIER YEARS.

Table 5. SELECTED CHARACTERISTICS OF FAMILIES BELOW THE POVERTY LEVEL BY SEX, RACE AND SPANISH ORIGIN OF HEAD: 1959, 1965, 1969, 1974, 1974 (REVISED), AND 1975—Continued

(Numbers in thousands. Families as of March of the following year. For meaning of symbols, see text)

[r] BASED ON REVISED METHODOLOGY. SEE SECTION ENTITLED, "REVISED 1974 MONEY INCOME AND POVERTY STATISTICS" FOR DETAILS.

[1] BEGINNING WITH THE MARCH 1970 CPS, DATA BASED ON 1970 CENSUS POPULATION CONTROLS; SEE TEXT FOR EXPLANATION.

[2] INCLUDES FAMILIES WITH CIVILIAN HEADS ONLY FOR 1974[r] AND 1975. IN ADDITION, FIGURES FOR 1974[r] AND 1975 ARE NOT STRICTLY COMPARABLE TO FIGURES FOR EARLIER YEARS BECAUSE UNPAID FAMILY WORKERS ARE INCLUDED IN THE 1974[r] AND 1975 FIGURES BUT ARE EXCLUDED FROM THE FIGURES FOR EARLIER YEARS.

Table 6. SELECTED MEASURES OF INCOME DEFICIT FOR FAMILIES AND UNRELATED INDIVIDUALS BELOW THE POVERTY LEVEL BY SEX AND RACE OF HEAD: 1959, 1963, AND 1967 TO 1975

(1975 dollars. Families and unrelated individuals as of March of the following year. For meaning of symbols, see text)

---

[7] OTHER TRANSFER PAYMENTS INCLUDE PUBLIC ASSISTANCE, UNEMPLOYMENT COMPENSATION, WORKMEN'S COMPENSATION, AND VETERANS' PAYMENTS.

[8] ''ALL OTHER'' INCOME INCLUDES DIVIDENDS, INTEREST, RENT, PRIVATE PENSIONS, GOVERNMENT EMPLOYEE PENSIONS, ALIMONY, AND ANNUITY INCOME.

[6] DETAIL DOES NOT ADD TO TOTAL BECAUSE SOME PERSONS RECEIVE MORE THAN ONE OF THE SPECIFIED TYPES OF INCOME.

APPENDIX A

DEFINITIONS AND EXPLANATIONS

Population coverage. This report excludes inmates of institutions and unrelated individuals under 14 years old. It includes only those approximately 1.0 million members of the Armed Forces living off post or with their families on post.

Farm-nonfarm residence. The farm population refers to rural residents living on farms. The definition of farm and nonfarm residence in the present survey and in the Current Population Surveys since March 1960 is the same as that used in the 1960 and 1970 censuses but differs from that used in earlier surveys and censuses. In the present survey, farm residence was determined by responses to two questions: (1) "Does this place you (own/rent) have 10 acres or more?", and (2) "During the past 12 months, how much did sales of crops, livestock and other farm products from this place amount to?" (under $50, $50 to $249, $250 to $999, or $1,000 or more). The household was classified as in the farm population if either a) the acreage response was "Yes" and sales amounted to $50 or more, or b) the acreage response was "No" and sales amounted to $250 or more. All other households were classified as in the nonfarm population, which comprises persons living in urban areas and rural persons not on farms. Rural persons in institutions, motels, and tourist camps, and those living on rented places where no land is used for farming, are classified as nonfarm population.

The method of determining farm residence in Current Population Surveys prior to 1960 was to ask the question, "Is this house on a farm (or ranch)?" All persons living on farms as determined by the answer to the question constituted the farm population. However, persons on "farms" who paid cash rent for a house and yard only were classified as nonfarm. However, as in the present definition, all rural persons in institutions, motels, and tourist camps were classified as nonfarm.

For detailed information on the effect of the above definitional change, see Series P-60, No. 35, pages 10 and 11.

In August 1975, the U.S. Department of Agriculture and the Bureau of the Census announced a change in the official definition of a farm. Under the new definition, as used in the 1974 Census of Agriculture, a farm is any place from which $1,000 or more of agricultural products were sold, or would normally be sold, from the place in the reporting year. However, for purposes of comparability, the figures presented in this report are based on the definition in use from 1960 to 1975.

Metropolitan-nonmetropolitan residence. The population residing in standard metropolitan statistical areas (SMSA's) constitutes the metropolitan population. Except in New England, an SMSA is a county or group of contiguous counties which contains at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, SMSA's consist of towns and cities, rather than counties.

The 1975 and the revised 1969 and 1971 to 1974 figures shown in this report for SMSA's are based on the SMSA's as defined on the basis of the 1970 census; those shown for earlier years refer to SMSA's defined on the basis of the 1960 census. As a result of these changes, the proportion of low-income families in 1969 living in metropolitan areas increased from about 49 percent to 52 percent. The comparable figures for families above the low-income level were 66 percent and 70 percent, respectively.

Central cities. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities. If only one central city is designated, then it must have 50,000 inhabitants or more. The area title may include, in addition to the largest city, up to two city names on the basis and in the order of the following criteria: (1) The additional city has at least 250,000 inhabitants or (2) the additional city has a population of one-third or more of that of the largest city and a minimum population of 25,000. An exception occurs where two cities have contiguous boundaries and constitute, for economic and social purposes, a single community of at least 50,000, the smaller of which must have a population of at least 15,000.

Geographic regions. The four major regions of the United States for which data are presented in this report represent groups of States, as follows:

Northeast: Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont.

North Central: Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin.

South: Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia.

West: Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming.

North and West: Northeast, North Central, and West regions combined.

Poverty areas. For this report poverty areas in metropolitan areas are defined in terms of census tracts and in nonmetropolitan areas in terms of minor civil divisions (townships, districts, etc.) in which 20 percent or more of the population was below the low-income level in 1969.

For further details, see **1970 Census of Population Report** PC(2)-9B, "Low-Income Areas in Large Cities," and Supplementary Reports PC(S1)-65 to PC(S1)-103, "Low-Income Neighborhoods in Large Cities: 1970."

Federal regions. The ten standard Federal administrative regions for which data are presented in this report represent groups of States, as follows:

Region I, Boston: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont.

Region II, New York: New Jersey, New York.

Region III, Philadelphia: Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, West Virginia.

Region IV, Atlanta: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee.

Region V, Chicago: Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin.

Region VI, Dallas-Fort Worth: Arkansas, Louisiana, New Mexico, Oklahoma, Texas.

Region VII, Kansas City: Iowa, Kansas, Missouri, Nebraska.

Region VIII, Denver: Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming.

Region IX, San Francisco: Arizona, California, Hawaii, Nevada.

Region X, Seattle: Alaska, Idaho, Oregon, Washington.

Mobility status. The population of the United States has been classified according to mobility status on the basis of a comparison between the place of residence of each person at the survey date and the place of residence 1 year earlier.

1. **Nonmovers.** This group consists of persons who were living in the same house at the end of the period as at the beginning of the period.

2. **Movers.** This group consists of all persons who were living in a different house in the United States at the end of the period than at the beginning of the period.

3. **Persons abroad.** This group consists of persons, either citizens or aliens, whose place of residence was outside the United States at the beginning of the period, that is, in an outlying area under the jurisdiction of the United States or in a foreign country.

Tenure. A housing unit is tabulated as "owner occupied" if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for; a cooperative or condominium is "owner occupied" only if the owner or co-owner lives in it. All other occupied units are classified as "renter occupied." For renter-occupied units, information was also obtained as to whether the unit was publicly owned or subsidized by the Federal, State, or local government.

Income. For each person 14 years old and over in the sample, questions were asked on the amount of money income received in the preceding calendar year from each of the following sources: (1) Money wages or salary; (2) net income from nonfarm self-employment; (3) net income from farm self-employment; (4) Social Security or railroad retirement; (5) supplemental security income; (6) public assistance or welfare payments; (7) interest (on savings or bonds); (8) dividends, income from estates or trusts, or net rental income; (9) veterans' payments or unemployment and workmen's compensation; (10) private pensions or government employee pensions; (11) alimony or child support, regular contributions from persons not living in the household, and other periodic income.

When an indefinite amount was reported by the respondent, a specific value was assigned during processing wherever possible. If the indefinite amount was reported in terms of a range, the midpoint of the range was assigned, e.g., $10,000 to $15,000 was coded as $12,500. Open-ended amounts were converted to specific amounts.

It should be noted that although the income statistics refer to receipts during the preceding year, the characteristics of the person, such as age, labor force status, etc., and the composition of families refer to the time of the survey. The income of the family does not include amounts received by persons who were members of the family during all or part of the income year if these persons no longer resided with the family at the time of enumeration. On the other hand, family income includes amounts reported by related persons who did not reside with the family during the income year but who were members of the family at the time of enumeration.

Data on income collected in the CPS are limited to money income received before payments for personal income taxes, Social Security, union dues, Medicare deductions, etc. Money income is the sum of the amounts received from earnings; Social Security and public assistance payments; dividends, interest, and rent; unemployment and workmen's compensation; government and private employee pensions; and other periodic income. (Certain money receipts such as capital gains are not included.) Therefore, money income does not reflect the fact that many families receive part of their income in the form of nonmoney transfers such as food stamps, health benefits, and subsidized housing; that many farm families receive nonmoney income in the form of rent-free housing and goods produced and consumed on the farm; or that nonmoney incomes are also received by some nonfarm residents which often take the form of the use of business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc.[1] These elements should be considered when comparing income levels. Moreover, readers should be aware that for many different reasons there is a tendency in household surveys for respondents to underreport their income. Overall, income earned from wages or salary is much better reported than other sources of income and is nearly equal to independent estimates of aggregate income. By contrast, recent CPS income data on Social Security and public assistance payments to beneficiaries have averaged approximately 91 percent and 77 percent of independent estimates, respectively.

Money wages or salary is total money earnings received for work performed as an employee during the income year. It includes wages, salary, Armed Forces pay, commissions, tips, piece-rate payments, and cash bonuses earned, before deductions were made for taxes, bonds, pensions, union dues, etc.

Net income from nonfarm self-employment is net money income (gross receipts minus expenses) from one's own business, professional enterprise, or partnership. Gross receipts include the value of all goods sold and services rendered. Expenses include costs of goods purchased, rent, heat, light, power, depreciation charges, wages and salaries paid, business taxes (not personal income taxes), etc. The value of salable merchandise consumed by the proprietors of retail stores is not included as part of net income.

---

[1] Estimates of Federally funded non-money transfer income programs benefiting persons below the low-income level are published in the **Statistical Abstract,** 1976, table 688. "Federal Outlays Benefiting Persons Below the Poverty Level: 1964 to 1974." It should be noted that federal outlays for in-kind benefits, which in table 664 include "Medicaid" and "Medicare" in addition to "Income security in kind", cannot be equated to increases in consumer income because they do not necessarily release equivalent amounts of funds for either consumption or savings.

Net income from farm self-employment is net money income (gross receipts minus operating expenses) from the operation of a farm by a person on his own account, as an owner, renter, or sharecropper. Gross receipts include the value of all products sold, government crop loans, money received from the rental of farm equipment to others, and incidental receipts from the sale of wood, sand, gravel, etc. Operating expenses include cost of feed, fertilizer, seed, and other farming supplies, cash wages paid to farmhands, depreciation charges, cash rent, interest on farm mortgages, farm building repairs, farm taxes (not State and Federal income taxes), etc. The value of fuel, food, or other farm products used for family living is not included as part of net income. In general, inventory changes were not considered in determining net income; however, replies based on income tax returns or other official records do reflect inventory changes.

Social Security includes Social Security pensions and survivor's benefits, and permanent disability insurance payments made by the Social Security Administration prior to deductions for medical insurance and railroad retirement insurance checks from the U.S. Government. "Medicare" reimbursements are not included.

Supplemental Security Income includes payments made by federal, state, and local welfare agencies to low income persons who are: (1) Aged (65 years old or over), (2) blind, or (3) disabled.

Dividends, interest (on savings or bonds), income from estates or trusts, net rental income or net royalties include dividends from stockholdings or membership in associations, interest on savings or bonds, periodic receipts from estates or trust funds, net income from rental of a house, store, or other property to others, receipts from boarders or lodgers, and net royalties.

Public assistance or welfare payments include public assistance payments such as aid to families with dependent children and general assistance. Separate payments received for hospital or other medical care (vendor payments) are excluded from this item.

Unemployment compensation or veterans' payments include: (1) Unemployment compensation received from government unemployment insurance agencies or private companies during periods of unemployment and any strike benefits received from union funds; (2) money paid periodically by the Veterans' Administration to disabled members of the Armed Forces or to survivors of deceased veterans, subsistence allowances paid to veterans for education and on-the-job training, as well as so-called "refunds" paid to ex-servicemen as GI insurance premiums; also includes (3) workmen's compensation received periodically from public or private insurance companies for injuries incurred at work. The cost of this insurance must have been paid by the employer and not by the person.

Private and government employee pensions include: (1) Private pensions or retirement benefits paid to a retired person or his survivors by a former employer or by a union, either directly or through an insurance company; (2) government employee pensions received from retirement pensions paid by Federal, State, county, or other governmental agencies to former employees (including members of the Armed Forces) or their survivors.

Annuities, alimony, regular contributions from persons not living in the household and other periodic income include the following types of income: (1) periodic receipts from annuities or insurance; (2) alimony and child support; (3) contributions received periodically from persons not living in the household; and (4) other periodic income such as military family allotments, net gambling winnings, and other kinds of periodic income other than earnings.

Receipts not counted as income. Receipts from the following sources were not included as income: (1) Money received from the sale of property, such as stocks, bonds, a house, or a car (unless the person was engaged in the business of selling such property, in which case the net proceeds would be counted as income from self-employment); (2) withdrawals of bank deposits; (3) money borrowed; (4) tax refunds; (5) gifts; and (6) lump sum inheritances or insurance payments.

All sources of income may be combined into two major types:

Total money earnings—the algebraic sum of money wages or salary and net income from farm and nonfarm self-employment; and

Income other than earnings—the algebraic sum of all sources of money income except wages and salaries and income from self-employment.

Total money income. The algebraic sum of money wages and salaries, net income from self-employment, and income other than earnings represents total money income. The total income of a family is the algebraic sum of the amounts received by all income recipients in the family.

The income tables for families and unrelated individuals include in the lowest income group (under $1,000) those that were classified as having no income in the income year and those reporting a loss in net income from farm and nonfarm self-employment or in rental income. Many of these were living on income "in kind," savings, or gifts; or were newly constituted families, unrelated individuals who had recently left families, or families in which the sole breadwinner had recently died or had left the household. However, many of the families and unrelated individuals who reported no income probably had some money income which was not recorded in the survey.

Median income. The median income is the amount which divides the distribution into two equal groups, one having incomes above the median, and the other having incomes below the median.

Mean income. The mean income is the amount obtained by dividing the total income of a group by the number of families or unrelated individuals (as appropriate) in that group.

Income per family member. The income per family member is the average amount of income available to every man, woman, and child in a family. Income per family member is derived by dividing the total family income of a group by the number of family members in the same group.

Comparability of Current Population Survey income data with other data from Bureau of Economic Analysis (BEA) personal income series. The income data presented in this report are not directly comparable with estimates of aggregate personal income prepared by the Bureau of Economic Analysis (formerly the Office of Business Economics) of the Department of Commerce. The lack of correspondence stems from the following differences in definition and coverage:

Income definition. The personal income series includes, among other items, the following types of nonmoney income which are not included in the census definition: Wages received in kind, the value of food and fuel produced and consumed on farms, the net rental value of owner-occupied homes, the property income received by mutual life insurance companies, and the value of the services of banks and other financial intermediaries rendered to persons without the assessment of specific charges. These items of income in kind account for about 4 percent of total personal income. The Census Bureau definition of income, on the other hand, includes such items as regular contributions for support received from persons who do not reside in the same living quarter, income received from roomers and boarders residing in households, and employee contributions for social insurance which are not included in the personal income series. These items, however, represent a much smaller income total than the nonmoney items included in personal income.

Source of data. The personal income series is estimated largely on the basis of data derived from business and governmental sources. These sources include the industrial and population censuses, employers' wage reports under the Social Security programs, and records of disbursements to individuals by governmental agencies. The income data presented in the census reports, on the other hand, are based directly on field surveys of households. As discussed in the section "Source and reliability of the estimates," income data obtained in household interviews are subject to various types of reporting errors which tend to produce an understatement of income. It is estimated that the income surveys conducted by the Bureau of the Census during the past few years have obtained about 90 percent of the comparable aggregate total money income, 97 percent of the comparable aggregate money wage or salary income, 91 percent of the comparable aggregate money Social Security income, and 77 percent of the comparable aggregate money public assistance income included in the personal income series prepared by the BEA. Comparable estimates are not available for the low-income population.

Poverty (low-income) definition. Poverty statistics presented in this report are based on a definition developed by the Social Security Administration in 1964 and revised by a Federal Interagency Committee in 1969.

Statistics presented in Census Bureau reports prior to publication of **Current Population Reports,** Series P-60, No. 68, "Poverty in the United States, 1959 to 1968," were based on the poverty index developed by the Social Security Administration (SSA) in 1964. This index provided a range of income cutoffs adjusted by such factors as family size, sex of the family head, number of children under 18 years old, and farm-nonfarm residence. At the core of this definition of poverty was the economy food plan, the least costly of four food plans that are nutritionally sound, designed by the Department of Agriculture. It was determined from the Department of Agriculture's 1955 survey of food consumption that families of three or more persons spend approximately one-third of their income on food; the poverty level for these families was, therefore, set at three times the cost of the economy food plan. For smaller families and persons living alone, the cost of the economy food plan was multiplied by factors that were slightly higher in order to compensate for the relatively larger fixed expenses of these smaller households. Annual revisions of these SSA poverty cutoffs were based on price changes of the items in the economy food budget.

As a result of deliberations of a Federal Interagency Committee in 1969, the following two modifications to the original SSA definition of poverty were recommended: (1) that the SSA thresholds for nonfarm families be retained for the base year 1963, but that annual adjustments in the levels be based on changes in the Consumer Price Index (CPI) rather than on changes in the cost of food included in the economy food plan; and (2) that the farm thresholds be raised from 70 to 85 percent of the corresponding nonfarm levels. The combined impact of these two modifications resulted in an increase of 360,000 poor families and 1.6 million poor persons in 1967. The reasons for making these changes are outlined below.

Change in cost of living adjustment. Annual revisions of the SSA poverty thresholds were based only on the average per capita cost of the foods in the economy food budget. This method of updating these cutoffs did not fully reflect increases in the overall cost of living during the 1960's. The pace at which the general cost of living advanced in the 1960's was not uniformly matched by increases in the price of goods in the economy food plan. Thus, general price changes since 1959 were not paralleled by comparable changes in the poverty thresholds. The differences between changes in the cost of the economy food budget and the overall cost of living led to the adoption of the CPI as the basis for annual revisions in the income cutoffs.

Table A-1 shows the changes in the CPI between 1959 and 1975 and the corresponding average thresholds for a nonfarm family of four.

Change in the farm-nonfarm relationship. Under the old definition, the poverty thresholds for farm families were adjusted for the average value of food consumed by these families which they had grown themselves. Based on a 1961 study of household consumption which indicated that the value of food produced by farm families for home use amounted to about 30 percent of their total food budget, the poverty cutoffs for farm families were established at 70 percent of the nonfarm levels.

Table A-1. Changes Between 1959 and 1975 in the Consumer Price Index and the Average Poverty Threshold for a Nonfarm Family of Four

Year	Consumer Price Index (1963=100)	Average threshold for a nonfarm family of four persons
1975........	175.8	$5,500
1974........	161.1	5,038
1973........	145.1	4,540
1972........	136.6	4,275
1971........	132.3	4,137
1970........	126.8	3,968
1969........	119.7	3,743
1968........	113.6	3,553
1967........	109.1	3,410
1966........	106.0	3,317
1965........	103.1	3,223
1964........	101.3	3,169
1963........	100.0	3,128
1962........	98.8	3,089
1961........	97.7	3,054
1960........	96.7	3,022
1959........	95.2	2,973

Up to the present time, no entirely satisfactory means of determining the income required for equivalent levels of living for farm and nonfarm families has been provided by studies on this subject. Further research is needed to analyze the differences in the costs between farm and nonfarm families. Although it is not yet possible to quantify exactly all the factors contributing to cost of living differences between farm and nonfarm families, research already completed suggests that the differences are not as great as provided for by the 70 percent differential. After weighing the available evidence, the Review Committee agreed that narrowing the farm-nonfarm differential to 85 percent more nearly reflects the overall cost of living differences between farm and nonfarm families than the previously used differential.

Alternate level. Because the poverty definition currently in use by the Federal Government does not meet all the needs of the analysts of the data, a variation was introduced at the same time that modifications were made to the SSA poverty index and set at 125 percent of the official government standard. This alternate cutoff is obtained by multiplying the income cutoffs at the low-income level by 1.25. Thus, the income cutoff for a nonfarm family of four at 125 percent of the low-income level is $6,875. Tables 2, 44 and 45 present selected data for persons, families, and unrelated individuals below 125 percent of the low-income level. Also, the entire set of tables shown in this report has been tabulated for those below 125 percent of the poverty level. Requests for these unpublished data, giving a specific description of the figures desired, may be made in writing to the Chief, Population Division, Bureau of the Census, Washington, D.C. 20233.

Weighted average thresholds at the poverty level. The low-income cutoffs used by the Bureau of the Census to determine the low-income status of families and unrelated individuals consist of a set of 124 thresholds arranged in a four-dimensional matrix consisting of family size (from one person, i.e., unrelated individuals, to seven or more person families) cross-classified by presence and number of family members under 18 years old (from no children present to six or more children present); sex of head, and farm-nonfarm residence (table A-2). Unrelated individuals and two-person families are further differentiated by age of head (under 65 years and 65 years and over). The total family income of each family in the sample is tested against the appropriate dollar threshold to determine the low-income status of that family. If the family's total income is less than its corresponding cutoff, the family is classified as below the low-income level. The average thresholds shown in table A-3 were weighted by the presence and number of children. For example, for a given size of family, sex of head, and residence category, the weighted average threshold for that group is obtained by multiplying the threshold for each presence and number of children category within the given family size by the number of families in that category. These products are then aggregated across the entire range of presence and number of children categories, and the total aggregate is divided by the total number of families in the group to yield the weighted average threshold at the low-income level for that size family.

Because family composition varies by farm-nonfarm residence, the weighted average thresholds at the low-income level for farm families, as shown in table A-3, will not be exactly 85 percent of the nonfarm levels. Moreover, since family composition does not remain constant from year to year, the weighted average thresholds for 1975 will not reflect, identically, the change in the CPI between 1975 and earlier years.

Since the basic thresholds used to determine the low-income status of families and unrelated individuals are applied to all families and unrelated individuals, the weighted low-income thresholds are derived using all families and unrelated individuals rather than just those families and unrelated individuals classified as below the low-income level. To obtain the weighted low-income thresholds for families and unrelated individuals below 125 percent of the low-income level, the weighted thresholds shown in table A-3 may be multiplied directly by 1.25.

Income deficit. Income deficit is the difference between the total income of families and unrelated individuals below the low-income level, and their respective income thresholds. In computing the income deficit, families reporting a net income loss are assigned zero dollars and for such cases the deficit is equal to the low-income threshold. This measure provides an estimate of the amount which would be required to raise the incomes of all low-income families and unrelated individuals to their respective low-income thresholds. The income deficit is thus a measure of the degree of impoverishment of a family or unrelated individual. However, caution must be exercised in comparing the average deficit of families of different racial groups. Since the low-income thresholds used in this report are based on family size and composition, apparent differences in the average income deficits of racial groups may, to some extent, be a function of the differences in these characteristics. It must also be remembered that the thresholds in this report vary according to the sex of the family head. Thus, differences in the average deficit between families with a male or female head may be in part attributable to both differences in thresholds and to differences in family size and composition.

Median income deficit. The median income deficit is the amount which divides the distribution into two equal groups, one having an income deficit above the median and the other having an income deficit below the median.

Mean income deficit. The mean income deficit is the amount obtained by dividing the total income deficit of a group below the low-income level by the number of families or unrelated individuals (as appropriate) in that group.

Deficit per family member. The deficit per family member is the average amount of money necessary to raise every man, woman, and child in a family out of poverty. The deficit per family member is derived by dividing the total family income deficit of a group by the number of family members in the same group.

Table A-2. Income Thresholds at the Poverty Level in 1975 by Sex of Head, Size of Family, and Number of Related Children Under 18 Years Old, by Farm-Nonfarm Residence

Size of family unit	Number of related children under 18 years old						
	None	1	2	3	4	5	6 or more
NONFARM							
Male Head							
1 person (unrelated individual):							
Under 65 years	$2,902						
65 years and over	2,608						
2 persons:							
Head under 65 years	3,629	$4,065					
Head 65 years and over	3,258	4,065					
3 persons	4,224	4,361	$4,610				
4 persons	5,569	5,651	5,456	$5,732			
5 persons	6,721	6,802	6,584	6,418	$6,556		
6 persons	7,709	7,734	7,571	7,406	7,187	$7,297	
7 or more persons	9,708	9,792	9,599	9,435	9,217	8,886	$8,805
Female Head							
1 person (unrelated individual):							
Under 65 years	$2,685						
65 years and over	2,574						
2 persons:							
Head under 65 years	3,352	$3,660					
Head 65 years and over	3,217	3,660					
3 persons	4,088	3,894	$4,307				
4 persons	5,347	5,540	5,514	$5,456			
5 persons	6,418	6,612	6,584	6,529	$6,309		
6 persons	7,488	7,625	7,571	7,515	7,269	$7,048	
7 or more persons	9,407	9,545	9,517	9,435	9,189	8,997	$8,558
FARM							
Male Head							
1 person (unrelated individual):							
Under 65 years	$2,466						
65 years and over	2,216						
2 persons:							
Head under 65 years	3,084	$3,454					
Head 65 years and over	2,769	3,454					
3 persons	3,591	3,707	$3,918				
4 persons	4,734	4,805	4,637	$4,872			
5 persons	5,713	5,782	5,595	5,455	$5,572		
6 persons	6,552	6,574	6,436	6,295	6,109	$6,202	
7 or more persons	8,254	8,324	8,161	8,020	7,835	7,554	$7,485
Female Head							
1 person (unrelated individual):							
Under 65 years	$2,282						
65 years and over	2,187						
2 persons:							
Head under 65 years	2,850	$3,111					
Head 65 years and over	2,735	3,111					
3 persons	3,473	3,310	$3,661				
4 persons	4,547	4,708	4,687	$4,637			
5 persons	5,455	5,620	5,595	5,549	$5,363		
6 persons	6,366	6,482	6,436	6,389	6,179	$5,991	
7 or more persons	7,995	8,115	8,090	8,020	7,811	7,647	$7,274

Table A-3. Weighted Average Thresholds at the Poverty Level in 1975 by Size of Family and Sex of Head, by Farm-Nonfarm Residence

Size of family unit	Total	Nonfarm			Farm		
		Total	Male head[1]	Female head[1]	Total	Male head[1]	Female head[1]
1 person (unrelated individual)..	$2,717	$2,724	$2,851	$2,635	$2,305	$2,396	$2,224
14 to 64 years.................	2,791	2,797	2,902	2,685	2,396	2,466	2,282

7 persons or more..............	8,939	9,022	9,056	8,818	7,639	7,639	7,647

[1] For one person (i.e., unrelated individual), sex of the individual.

Family. The term "family," as used in this report, refers to a group of two or more persons related by blood, marriage, or adoption and residing together; all such persons are considered as members of the same family. Thus, if the son of the head of the household and the son's wife are in the household, they are treated as part of the head's family. On the other hand, a lodger and his wife not related to the head of the household or an unrelated servant and his wife are considered as additional families, and not a part of the household head's family.

Head of family. One person in each family was designated as the head. Women are not classified as heads if their husbands are resident members of the family at the time of the survey. In other cases, the head is usually the person regarded as the head by members of the family. Married couples related to the head of a family are included in the head's family and are not classified as separate families.

Subfamily. A subfamily is a married couple with or without children, or one parent with one or more own single children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. The most common example of a subfamily is a young married couple sharing the home of the husband's or wife's parents. Members of a subfamily are also members of a primary family. The number of subfamilies, therefore, is not included in the number of families.

Marital status. The marital status classification refers to the status at the time of enumeration. "Separated" is regarded as a subdivision of the category "married" and includes persons with legal separations, those living apart with intentions of obtaining a divorce, and other persons permanently or temporarily separated because of marital discord.

Size of family. The term "size of family" refers to the number of persons who are living together and are related to each other by blood, marriage, or adoption.

Unrelated individual. The term "unrelated individuals," as used in this report, refers to persons 14 years old and over (other than inmates of institutions) who are not living with any relatives. An unrelated individual may constitute a one-person household by himself, or he may be part of a household including one or more other families or unrelated individuals, or he may reside in group quarters such as a rooming house. Thus, a widow living by herself or with one or more other persons not related to her and a lodger not related to the head of the household or to anyone else in the household are examples of unrelated individuals.

Own children and related children. "Own" children in a family are sons and daughters, including stepchildren and adopted children, of the family head. "Related" children in a family include own children and all other children in the household who are related to the family head by blood, marriage, or adoption.

Number of earners. This number includes all persons in the family with $1 or more in wages and salaries, or $1 or more or a loss in net income from farm or nonfarm self-employment.

Age. The age classification is based on the age of the person at his last birthday.

Race. The population is divided into three groups on the basis of race: White, Black, and "other races." The last category includes Indians, Japanese, Chinese, and any other race except White and Black.

Spanish origin. To reduce the sampling variability and thereby increase the reliability of the data for persons of Spanish origin, the number of "Spanish households" in the March 1976 CPS was doubled compared to earlier years. This was accomplished by interviewing in March 1976, in addition to the "regular" sample, the households from the November 1975 sample containing at least one person of Spanish origin. Because of changes in sample design, question wording, and allocation procedures to assign origin to persons under 14 years of age, the overall count of persons of Spanish origin in the March 1973 to 1976 CPS is not strictly comparable with data for earlier years. Comparability of Spanish origin data from the March 1973 CPS with those for earlier years is discussed in **Current Population Reports,** Series P-20, No. 264, "Persons of Spanish Origin in the United States: March 1973."

Years of school completed. Data on years of school completed in this report were derived from the combination of answers to questions concerning the highest grade of school attended by the person and whether or not that grade was finished. The questions on educational attainment apply only to progress in "regular" schools. Such schools include graded public, private, and parochial elementary and high schools (both junior and senior high), colleges, universities, and professional schools, whether day schools or night schools. Thus, regular schooling is that which may advance a person toward an elementary school certificate or a high school diploma, or a college, university, or professional school degree. Schooling in other than regular schools was counted only if the credits obtained were regarded as transferable to a school in the regular school system.

The median years of school completed is defined as the value which divides the distribution into two equal groups, one having completed more schooling and one having completed less schooling than the median. These medians are expressed in terms of a continuous series of numbers representing years of school completed. For example, a median of 9.0 represents the completion of the first year of high school and a median of 13.0 means completion of the first year of college.

Labor force and employment status. The definitions of labor force and employment status in this report relate to family heads and unrelated individuals 14 years old and over.

Employed. Employed persons comprise (1) all civilians who, during the specified week, did any work at all as paid employees or in their own business or profession, or on their own farm, or who worked 15 hours or more as unpaid workers on a farm or in a business operated by a member of the family, and (2) all those who were not working but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, or labor-management dispute, or because they were taking time off for personal reasons, whether or not they were paid by their employers for time off, and whether or not they were seeking other jobs. Excluded from the employed group are persons whose only activity consisted of work around the house (such as own home housework, painting or repairing own home, etc.) or volunteer work for religious, charitable, and similar organizations.

Unemployed. Unemployed persons are those civilians who, during the survey week, had no employment but were available for work and (1) had engaged in any specific jobseeking activity within the past 4 weeks, such as registering at a public or private employment office, meeting with prospective employers, checking with friends or relatives, placing or answering advertisements, writing letters of application, or being on a union or professional register; (2) were waiting to be called back to a job from which they had been laid off; or (3) were waiting to report to a new wage or salary job within 30 days.

Labor force. Persons are classified as in the labor force if they were employed as civilians, unemployed, or in the Armed Forces during the survey week. The "civilian labor force" is comprised of all civilians classified as employed or unemployed.

Not in the labor force. All civilians 14 years old and over who are not classified as employed or unemployed are defined as "not in the labor force." This group who are neither employed nor seeking work includes persons engaged only in own home housework, attending school, or unable to work because of longterm physical or mental illness; persons who are retired or too old to work; seasonal workers for whom the survey week fell in an off season; and the voluntarily idle. Persons doing only unpaid family work (less than 15 hours) are also classified as not in the labor force.

Occupation, industry, and class of worker. Persons are classified according to the civilian job held longest during the year. Persons who held two jobs or more were reported in the job at which they worked the greatest number of weeks.

The occupation and industry groupings included in this report were based on the classification system used in the 1970 census, as were the data included in **Current Population Reports,** Series P-60, Nos. 81, 86, 91, 98, and 102. A detailed comparison of the 1970 classification systems to those used during the 1960's may be found in the Bureau of the Census Technical Paper 26, **1970 Occupation and Industry Classification Systems in Terms of Their 1960 Occupation and Industry Elements.**

In addition to the change in occupational titles between the March 1972 and the March 1971 surveys which did not affect the comparability of the data, a supplemental question, "What were your most important activities or duties?" was added which provided additional information for classifying persons by occupation. In general, the major impact of this supplemental question was to reclassify some persons from the "managers" classification into other types of occupations (primarily into the major occupation group of "craft and kindred workers").

Class of worker refers to the subdivision of workers into three groups: Wage and salary workers, self-employed workers, and unpaid family workers. The first group refers to persons working for wages, salaries, commissions, tips, pay "in kind", or at piece rate for private employer or for any government unit. The second group refers to persons working in their own business, profession, or trade, for profit or fees. The third group refers to persons working without pay in a business operated by a member of the household to whom they are related by blood or marriage.

Work experience. A person with work experience is one who, during the preceding calendar year, did any civilian work for pay or profit or worked without pay on a family-operated farm or business at any time during the year, on a part-time or full-time basis.

Weeks worked in the income year. Persons are classified according to the number of different weeks during the preceding calendar year in which they did any civilian work for pay or profit (including paid vacations and sick leave) or worked without pay on a family-operated farm or business.

Part-time or full-time jobs. A person is classified as having worked at part-time jobs during the preceding calendar year if he worked at civilian jobs which provided less than 35 hours of work per week in a majority of the weeks in which he worked during the year. He is classified as having worked at full-time jobs if he worked 35 hours or more per week during a majority of the weeks in which he worked.

Year-round full-time worker. A year-round full-time worker is one who worked primarily at full-time civilian jobs (35 hours or more per week) for 50 weeks or more during the preceding calendar year

Nonworker. A nonworker is one who did not do any civilian work in the calendar year preceding the survey.

Main reason for working part year. For persons who worked 1 to 49 weeks during the year, the main reason for working part year is based on the response to the question "What were you doing most of the remaining weeks?"

Main reason for not working. For persons who reported that they did not work at a civilian job for pay or profit or on a family-operated farm or business during the year, the main reason for not working is derived from the response to the question "What were you doing most of last year?"

Symbols. A dash "–" represents zero, and the symbol "Z" indicates that the figure is less than 0.05 percent. The symbol "B" means that the base for the derived figure is less than 75,000. An "X" means not applicable, and "NA" means not available.

Rounding. Percentages are rounded to the nearest tenth of a percent; therefore, the percentages in a distribution do not always add to exactly 100.0 percent. The totals, however, are always shown as 100.0. Moreover, individual figures are rounded to the nearest thousand without being adjusted to group totals, which are independently rounded; percentages are based on the unrounded numbers.

Base figures. An estimate of the size of the base (number of persons and families, etc.) of each percent is shown in most of the tables of this report. The 1971 to 1975, and revised 1970 and 1969 base figures shown in this report were prepared by inflating weighted sample results to agree with independent estimates of the population based on statistics updated from the 1970 census. The base figures for the years 1961 to 1969 were inflated to estimates derived from the 1960 census. The data for the years prior to 1961 were based on the 1950 census.

The major effects resulting from the introduction of population controls and estimation procedures based on the 1970 census were to raise the number of families from 51.2 million to 51.6 million in the March 1970 CPS and to lower the number of related children under 18 from 69.8 to 68.7 million. However, the number of poor families and the number of related children below the low-income level remained about the same—5 million and about 9.5 million, respectively.

LIMITATIONS OF THE POVERTY CONCEPT

In analyzing data on the low-income population, the following limitations should be noted. The low-income concept has been developed in order to identify, in dollar terms, a minimum level of income adequacy for families of different types in keeping with American consumption patterns. Based on an analysis of the percent of income devoted to food expenditures, an estimate was developed of the minimum cost at which an American family, making average choices, can be provided with a diet meeting recommended nutritional goals. Consequently, it is an overall statistical yardstick which reflects the different consumption requirements of families of different size, taking into account family composition and farm-nonfarm residence. Insofar as individual circumstances or consumption patterns differ, the dollar value of the low-income threshold for a given family size may not represent the money income required by an individual family to maintain a level of economic well being equivalent to other families with similar incomes. For a discussion of the limitations of money income as a measure of economic status, see "Trends and Composition of the Low-Income Population," by Renée Miller and Arno Winard, **Proceedings of the Social Statistics Section,** American Statistical Association, 1974.

The original intent of the poverty definition was not for administrative use in any specific program; it was to be a statistical yardstick. In April 1973, the Interagency Committee on Income Distribution and Poverty was requested by the Statistical Policy Division of the Office of Management and Budget to conduct a thorough review of the statistics on income and poverty. Three subcommittees, one focusing on updating the poverty threshold, another on measuring cash income, and the third on measuring noncash income, met throughout the summer of 1973 and came up with a number of recommendations. One of the conclusions reached by the Subcommittee on Updating the Poverty Threshold was that the development of separate measures for eligibility in programs should receive high priority. For a summary of the research recommendations of the Interagency Committee see "Review of Poverty and Income Distribution Statistics" by Bette S. Mahoney, **Statistical Reporter,** Statistical Policy Division, Office of Management and Budget, January 1974.

A detailed review of the poverty definition has recently been completed. The Education, Amendments of 1974 required the Assistant Secretary of Education, Department of Health, Education, and Welfare, to supervise a "thorough study of the manner in which the relative measure of poverty for use in the financial assistance program authorized by Title I of the Elementary and Secondary Education Act of 1965 may be more accurately and currently developed." At the end of 1974 an interagency Poverty Studies Task Force was established under the leadership of HEW which undertook an intensive review of the present definition of poverty and of the implications of various alternative measurement schemes. The findings of this study have been summarized in the report entitled "The Measure of Poverty" which was transmitted to Congress in April of 1976. Additional information about the study as well as requests for copies of the report should be addressed to: Mr. George Grob, Department of Health, Education, and Welfare, Room 443-D, South Portal Building, Washington, D.C. 20201.

COMPARABILITY OF ESTIMATES FROM MARCH 1976 CPS WITH ESTIMATES FOR PREVIOUS YEARS

The data for 1971 to 1975 are in some instances not entirely comparable to figures for earlier years because of revisions in the Current Population Survey. Starting in January 1972, 1970 census-based population controls, metropolitan residence definitions, and other materials were introduced into the sample and estimation procedures. The major item affecting comparability at the overall national level is the introduction of population controls based on the 1970 census. Figures for previous years are tied in with 1960 census-based population controls. In a number of instances, data from the March 1970 and 1971 CPS's were revised to take account of 1970 census-based population controls, thus providing some measure of the impact of the changes (see Table 3, **Current Population Reports,** Series P-60, No. 91). Basically, these changes should have no substantial impact on summary measures, such as medians and means, and on proportional measures, such as percent distributions and low-income or poverty rates. However, the changes may have more impact on the population levels in different subgroupings such as the total number of persons or families either overall, within some particular income interval, or below the low-income level. A detailed description of these changes appears in the Bureau of Labor Statistics report, "Employment and Earnings," Vol. 18, No. 8, February 1972.

The figures shown in this report for metropolitan areas (SMSA's) are based on the SMSA's as defined on the basis of the 1970 census; those published in earlier years referred to SMSA's as defined on the basis of the 1960 census. There are significant differences in the population classified as metropolitan from each of these definitions. For the 1970 definition of SMSA's, see **1970 Census of Population,** United States Summary, PC(1)-A1, "Number of Inhabitants."

Another change in the Current Population Survey, which affects occupational data only is the inclusion of a supplemental question, "What were your most important activities or duties?" which provided additional information for classifying persons by occupation. In general, the impact of this supplemental question was to reclassify some persons from the "managers" classification into other types of occupations (primarily into the major occupation group of "craft and kindred workers").

NONRESPONSES AND ALLOCATIONS

In the March 1976 CPS, no information was recorded for approximately 5 percent of the 47,000 households because no interview could be obtained during the week in which the enumeration was conducted. In order to account for these households, the weights assigned to other sample households of similar characteristics residing in the same sample areas were increased accordingly. In addition, complete income information was not reported for about 26 percent of all families. Overall, about 20 percent of all persons 14 years old and over in households that were interviewed did not report complete income information.

Although nonresponse rates for families by low-income status are not available, it is known that families in the lower income intervals tend to have lower nonresponse rates than those in the middle and upper income intervals. This is due in part to the fact that lower income families have less complicated financial arrangements than those in other income groups. For a more detailed discussion of this topic see paper by Mitsuo Ono and Herman P. Miller, "Income Nonresponses in the Current Population Survey" published in **Proceedings of the Social Statistics Section,** American Statistical Association, 1969.

For more detailed information on the characteristics of nonrespondents, see "Characteristics of Income Nonrespondents in the Current Population Survey," by Emmett Spiers, John Coder, and Mitsuo Ono, **American Statistical Association Proceedings of the Social Statistics Section, 1971.**

In order that the maximum amount of information can be utilized, missing income items are imputed or allocated by values which are obtained from active respondents with similar economic and demographic characteristics. Beginning with the March 1962 survey, when a respondent did not answer one or more of the income items, all of his income data were imputed.

Beginning with the March 1966 survey, however, in the event a respondent did not answer one or more of the income questions, the missing income data for this person were imputed for only those income items which were not answered. Each of the earnings items was handled individually, whereas income items other than earnings were handled as a group. Characteristics used in this imputation are age, family status, race, residence, weeks worked, and major occupation group. The income amount assigned to a nonrespondent is that observed for another person with similar demographic and economic characteristics who did respond and who has been selected systematically in the order in which individual records are processed.

In the tabulation of income from surveys prior to 1962, the distributions by income levels had been based only on those cases which reported complete income information. The assumption implicit in this method was that persons who do not provide income information have the same income distribution as those who do provide such information. Using income data for 1958, a comparison was made of the income distributions obtained before and after the assignment of income to nonrespondents on the basis of known demographic and economic characteristics. This comparison indicated that the procedure for making individual assignments of income to nonrespondents resulted in slightly higher estimates of the proportion of families and individuals in the upper income classes than those obtained from the distributions based solely on those reporting on income. (See **Current Population Reports,** Series P-60, No. 33, tables F and G.)

Beginning with 1967 CPS, the Bureau of the Census introduced improved income edit and allocation procedures. The main feature of the new procedures is a more refined method for imputing missing income data which expands the use of information already known about that person. Among the major improvements made affecting the income data are the following: (1) An expanded set of social and economic characteristics within which the imputations are made; in addition to age, race, occupation, and weeks worked, the new procedures include sex and type of family member as major variables within which the missing income items are imputed; (2) the elimination of inconsistent reporting which resulted in having workers with no earnings and earners with no weeks worked; and (3) the new imputation procedure assigns missing earnings entries first and then utilizes the earnings information to assign missing sources of income other than earnings.

However, because of coding errors in the processing of the 1968 CPS data, in that year alone it was not possible to apply all the aforementioned improvements to the editing and allocation procedures. Since these errors produced an under-estimate of income, they had the effect of over-stating the number of poor.

In addition, it was discovered that the computer procedures for editing certain incorrect income codes caused an upward bias in the income data for some respondents and therefore would tend to produce an underestimate of the number of poor. It is estimated that the net impact of these errors had the effect of overestimating the number of poor families by about 120 thousand. Due to these errors affecting the income data for 1967, data for that year are not strictly comparable with those shown for 1966 and 1968 to 1974.

Comparison of 1966 poverty data according to original and revised editing and allocation procedures. In order to evaluate the impact of the new procedures, the poverty data from the March 1967 CPS were rerun, thus providing a bridge for the 1966 income year showing the results of both the earlier and the new procedures. Both series of data are shown in table 1 of **Current Population Reports,** Series P-60, No. 98. The general impact of the new allocation procedure was to shift the income distribution slightly upward, thus decreasing by 416,000 the number of poor families. A more detailed description of the new computer editing and allocation procedures may be found in **Current Population Reports,** Series P-60, No. 59, "Income in 1967 of Families in the United States," pages 17 to 19.

In processing the data collected in the March 1976 Current Population Survey, the Bureau of the Census utilized a new computer processing system designed to take maximum advantage of the Bureau's expanded computer capabilities. The revised system also incorporates many improvements in the income and edit allocation procedures. A detailed discussion of these improvements and the subsequent revisions to the 1974 income and poverty data (for comparability with 1975 data) is provided in an earlier section, entitled "Revised 1974 Money Income and Poverty Statistics," p.

QUESTIONNAIRE AND PROCEDURAL CHANGES

Modifications in collecting income data in the March-April 1969 CPS. Several modifications were introduced in the collection of income data in the March and April CPS supplements. These include: (1) Extension of the interview period of the six rotation groups for which income questions were asked in March and the use of followup forms in these six groups to accommodate household respondents who needed more time to obtain the required income information (it is estimated that some members of approximately 4,400 households, or 9 percent of the total relevant households, made use of these followup forms); (2) modification of the design and content of the questionnaire to allow for more detailed questioning of certain income items; thus, boxes for gross receipts, business expenses, and net income have been added to the self-employment income questions to help the interviewer and respondent determine net income, and "yes-no" circles were added to the questions on income other than earnings in order to ascertain whether the respondent received or did not receive income; (3) field office editing procedures were extended to a 100 percent income edit of the CPS schedules; (4) training instructions were strengthened by including more detailed explanations and more examples, and (5) the interview group training session was shifted from February to March.

Modifications in collecting income data in the March 1970 Current Population Survey. The Bureau introduced modifications in the collection of income data for the March 1970 CPS supplement. These were: (1) An advance letter informing households about the collection of income data was mailed to all households except those in the first and fifth months. The latter households received special letters which explained the need for collecting both CPS and census data; (2) information on work experience and income was collected simultaneously for the full sample (in previous years, work experience information was collected separately from income data); (3) the interview period was extended one week for three-fourths of the sample (using followup calls and separate questionnaires). In addition, modified procedures which were incorporated in the March 1969 CPS supplement were also implemented in the March 1970 CPS. Overall, data indicate that the use of these procedures has resulted in some improvement in the collection of income data. The family income nonresponse rate has not only dropped by 5 percentage points (from 19 to 14 percent) but also it appears that the proportion of aggregate income amounts collected in the March 1970 CPS relative to benchmark totals has increased slightly in the March 1970 CPS supplement as compared with the proportion collected in the March 1969 CPS supplement.

Modification in collecting income data in the March 1971 Current Population Survey. The Bureau continued to use the improved procedures which were incorporated in the March 1970 CPS. Procedural changes that were instituted in the March 1971 CPS, among others, were:

1. The interview period was extended one week for all households in the sample (using follow-up calls and separate questionnaires). In the previous year's survey, the interview period was extended for only three-fourths of the sample.

2. Income from net royalties was included in the question covering estates, trusts, or dividends, interest on savings accounts or bonds, and net rental income. In previous surveys, income from net royalties was included in the question covering private pensions, annuities, alimony, regular contributions from persons not living in this household, and anything else.

3. An additional regional office follow-up was made by telephone to obtain income amounts for all follow-up cases containing one or more persons who were not interviewed during the original follow-up period, except for refusal.

Modifications in collecting income data in the March 1975 Current Population Survey. Several modifications in the design and content of the questionnaire were introduced in the March 1975 CPS to allow for more detailed questioning of certain income items. These changes were:

1. In the March 1974 CPS, income from aid to families with dependent children, old age assistance, and aid to the blind or totally disabled were asked in one combined question on welfare payments. Beginning in January 1974, the programs for old age assistance and aid to the blind or totally disabled were replaced by the Supplemental Security program. Therefore, in March 1975 a separate question was asked for the receipt of supplemental security income. Income from aid to families with dependent children or any other assistance was asked under the general category of public assistance or welfare payments.

2. In the March 1974 CPS, income from interest, net rental income or income from estates, trusts, or dividends was asked in one question. In the 1975 CPS these income types were asked as two questions with income received from interest on savings accounts or bonds included in one question and income from estates, trusts, or dividends in the other.

3. In the March 1974 CPS, income received from private pensions was asked along with alimony and certain other income items while income from government employee pensions was asked along with veterans' payments, unemployment compensation and workmen's compensation. In the March 1975 CPS, income received from both private and government employee pensions (including military retirement) were extracted from their previous categories and asked as one combined question.

OTHER LIMITATIONS OF THE DATA

Although every effort is made to reduce the errors of underreporting, nonreporting or misreporting of income data in the Current Population Survey, they still occur because of various reasons. Some of these are (1) overlooking income received, especially small amounts of income types not regularly received, e.g., contributions from nonhousehold members, (2) reluctance to reveal certain types of income, e.g., public assistance (3) rounding estimates, (4) misunderstanding the question, (5) lack of information, especially covering family members not present at the time of interview, (6) interviewers' errors, (7) processing errors, etc. For more details on this topic of income underreporting in censuses and surveys, see (1) **Income Distribution in the United States** (a 1960 Census Monograph), by Herman P. Miller, Bureau of the Census, 1966, (2) **The Structure of Income,** by Irving B. Kravis, University of Pennsylvania, 1962; and (3) "Size Distribution of Family Personal Income: Methodology and Estimates for 1964," by Edward C. Budd, Daniel B. Radner, and John C. Hinrichs, Bureau of Economic Analysis, BEA-SP 73-21, June 1973.

SOURCE AND RELIABILITY OF THE ESTIMATES

Source of data. The estimates in this report are based on data obtained annually in March of 1960 through 1976 from the Current Population Survey (CPS) of the Bureau of the Census and from supplementary questions to the CPS. The monthly CPS deals mainly with labor force data for the civilian noninstitutional population. Questions relating to labor force participation are asked about each member 14 years old and older in each sample household. In addition, supplementary questions were asked each March about money income for the previous year. For this report, persons in the Armed Forces living off post or with their families on post were also included.

The present CPS sample was initially selected from the 1970 Census file and is updated continuously to reflect new construction where possible (see section entitled "Nonsampling Variability" below). Samples for previous sample designs were selected from files of the Census most recently completed at the time.

The following table provides a description of some aspects of the CPS sample designs in use during the referenced data-collection periods.

Description of the Current Population Survey

Time period	Number of sample areas[1]	Households eligible		Households visited, not eligible[2]
		Interviewed	Not interviewed	
Aug. 1972 to Present.........	461	45,000	2,000	8,000
Aug. 1971 to July 1972.......	449	45,000	2,000	8,000
Jan. 1967 to July 1971.......	449	48,000	2,000	8,500
Mar. 1963 to Dec. 1966[3]......	357	33,500	1,500	6,000
Jan. 1960 to Feb. 1963.......	333	33,500	1,500	6,000

[1] These areas were chosen to provide coverage in each state and the District of Columbia.

[2] These are households which were visited, but were found to be vacant or otherwise not eligible for interview.

[3] Prior to 1966, income data were collected from approximately 75 percent of occupied households in CPS.

The estimation procedure used for the monthly CPS data involves the inflation of the weighted sample results to independent estimates of the civilian noninstitutional population of the United States by age, race, and sex. These independent estimates were based on statistics from decennial censuses; statistics on births, deaths, immigration, and emigration; and statistics on the strength of the Armed Forces. The estimation procedure for the data in the report also involved a further adjustment so that the husband and wife of a household received the same weight.

Reliability of the estimates. Since the estimates in this report were based on a sample, they may differ somewhat from the figures that would have been obtained if a complete census had been taken using the same schedules, instructions, and enumerators. There are two types of errors possible in an estimate based on a sample survey—sampling and nonsampling. For estimates in this report, indications of the magnitude of sampling error are provided, but the extent of the nonsampling error is unknown. Consequently, particular care should be exercised in the interpretation of figures based on a relatively small number of cases or on small differences between estimates.

Nonsampling variability. As in any survey work, the results are subject to errors of response and nonreporting in addition to sampling variability. Nonsampling errors can be attributed to many sources, e.g., inability to obtain information about all cases in the sample, definitional difficulties, differences in the interpretation of questions, inability or unwillingness to provide correct information on the part of respondents, inability to recall information, mistakes made in collection such as in recording or coding the data, mistakes made in processing the data, mistakes made in estimating values for missing data, and failure to represent all units with the sample (undercoverage). The approximate magnitude of two sources of undercoverage in CPS is known and is described next.

Approximately 600,000 conventional new construction units were issued building permits prior to the 1970 Census but building was not completed by the time of the Census (i.e., April 1970); these units have no representation in the CPS sample. Conventional new construction, for which building permits were issued after the Census, is represented. In addition to undercoverage of conventional new construction, CPS misses at least 200,000 new mobile homes. These are missed because there is no systematic sampling procedure to provide representation of mobile homes constructed since the 1970 Census.

Note: These estimates of missed units are relevant to the present sample only and not to earlier designs where the extent of undercoverage was generally less.

In most cases the schedule entries for income are based on the memory or knowledge of one person, usually not the major earner. The memory factor in data derived from field surveys of income probably produces underestimates because the tendency is to forget minor or irregular sources of income. Other errors of reporting are due to misrepresentation or to misunderstanding as to the scope of the income concept. Some of those errors are discussed in greater detail in the text of the report. See also the sections entitled "Other Limitations of the Data" and "Revised 1974 Money Income and Poverty Statistics."

Sampling variability. The standard errors given in the following tables are primarily measures of sampling variability, that is, of the variations that occurred by chance because a sample rather than the whole of the population was surveyed. As calculated, the standard error also partially measures the effect of certain response and enumeration errors, but it does not measure any systematic biases in the data. The chances are about 68 out of 100 that an estimate from the survey differs from a complete census figure by less than the standard error. The chances are about 90 out of 100 that this difference would be less than 1.6 times the standard error and about 95 out of 100 that the difference would be less than twice the standard error.

All the statements of comparison appearing in the text are significant at a 1.6 standard error level or better, and most are significant at a level of more than 2.0 standard errors. This means that for most differences cited in the text, the estimated difference is greater than twice the standard error of the difference. Statements of comparison qualified in some way (e.g., by use of the phrase, "some evidence") have a level of significance between 1.6 and 2.0 standard errors.

Note when using small estimates. Summary measures (such as means, medians, and percent distributions) are shown in the report only when the base is 75,000 or greater. Because of the large standard errors involved, there is little chance that summary measures would reveal useful information when computed on a smaller base. Estimated numbers are shown, however, even though the relative standard errors of these numbers are larger than those for corresponding percentages. These smaller estimates are provided primarily to permit such combinations of the categories as serve each user's needs.

Standard error tables and their use. Instead of providing individual standard error tables for each characteristic of interest, one generalized standard error table is provided for each set of characteristics having nearly equal standard errors. As a result, the tables of standard errors provide an indication of the order of magnitude of the standard errors rather than the precise standard error for any specific item. Standard errors for intermediate values not shown in the tables may be approximated by interpolation.

The figures presented in tables A-4 through A-10 are approximations to the standard errors of various estimates shown in this report for the years 1966 through 1975. Tables A-4 and A-5 contain the standard errors of estimates of the number of total persons and persons 65 years old and over by poverty status and the number of families and unrelated individuals regardless of poverty status for "Total or White" and "Black and Other Races," respectively. The last column of tables A-4 and A-5 pertaining to families should also be used for items which can typically appear only once in a given family, e.g., "number of heads of families."

Table A-4. Standard Errors of Estimated Numbers: 1966 through 1975

Total or White

(68 chances out of 100. Numbers in thousands)

Size of estimate	Standard error for persons				Standard error for families and unrelated individuals
	All income levels		Below poverty level

15,000	98	(X)	195	(X)	(X)

X Not applicable.

Note: See table A-11 for factors to be applied to the standard errors for other characteristics and table A-12 for factors for the years 1959 through 1965.

Table A-6 contains the standard errors of the estimated number of persons below the poverty level in the 10 Federal Regions in the United States.

Tables A-7 through A-10 contain standard errors of estimated percentages of persons below the poverty level for the United States and the 10 Federal Regions and of families and unrelated individuals regardless of poverty status for the United States.

Table A-11 presents the factors (f_1) to be used for other characteristics and table A-12 presents the factors (f_2) to be used for the years 1959 to 1965. These factors must be applied to the generalized standard errors in tables A-4 through A-10 in order to adjust for the combined effect of sample design and the estimating procedure on the value of the characteristic. For example, to produce approximate standard errors for families below the poverty level in 1959 with seven or more members, use the factor 1.1 for family size from table A-11 and the factor 1.4 for 1959 from table A-12. Thus from table A-4, the generalized standard error on 1,257,000 families is 35,000; applying the two factors, 1.1 and 1.4, the standard error for families below the poverty level in 1959 with seven or more members is 1.1 x 1.4 x 35,000 = 54,000 families.

Standard errors of estimated numbers of persons and families below the poverty level are shown in Tables 10, 16, and 40 of this report.

To calculate standard errors for persons and families in poverty it was necessary to use two parameters (denoted as "a" and "b") which are presented in tables A-13 through A-16. These parameters were used to calculate the tabulated standard errors in tables A-4 through A-10 and to calculate the factors in table A-11. They also may be used to calculate the standard errors for estimated numbers and estimated percentages. Direct computation of the standard errors will give more accurate results than the use of the standard error tables. Methods for direct computation are given in the following sections.

Standard errors of estimated numbers. The approximate standard error, σ_x, of an estimated number shown in this report can be obtained in two ways. It may be obtained by use of the formula

$$\sigma_x = f_1 \; f_2 \; \sigma \qquad (1)$$

where f_1 is the appropriate factor from Table A-11, f_2 is appropriate factor from table A-12, and σ is the standard error for a characteristic obtained by interpolation from table A-4, -5 or -6. Alternatively, the standard errors may be approximated by the following formula, (2) from which the standard errors were calculated in tables A-4, -5, and -6. Use of this formula will provide more accurate results than the use of formula (1) above.

$$\sigma_x = f_2 \sqrt{ax^2 + bx} \qquad (2)$$

Here x is the size of the estimate and a and b are the parameters in tables A-13 to A-16 associated with the particular type of characteristic.

Standard errors of estimated percentages. The reliability of an estimated percentage, computed using sample data for both numerator and denominator, depends on both the size of the percentage and the size of the total upon which this percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more. When the numerator and denominator of the percentage are in different categories, use the factor or parameters indicated by the numerator. The approximate standard error $\sigma_{(x,p)}$, of an estimated percentage can be obtained by use of the formula

$$\sigma_{(x,p)} = f_1 \; f_2 \; \sigma \qquad (3)$$

In this formula f_1 is the appropriate factor from Table A-11, f_2 the appropriate factor from Table A-12, and σ is the standard error for a characteristic in tables A-7 through A-10. Alternatively, the standard errors may be approximated by the following formula, (4), from which the standard errors in tables A-7 through A-10 were calculated; direct computation will give more accurate results than use of the standard error tables and the factors.

$$\sigma_{(x,p)} = f_2 \sqrt{\frac{b}{x} \cdot p(100\text{-}p)} \qquad (4)$$

Here x is the size of the subclass of the persons or families and unrelated individuals which is the base of the percentage, p is the percentage ($0 \leq p \leq 100$), and b is the parameter in Tables A-13 to A-16 associated with the particular type of characteristic in the numerator of the percentage.

Table A-6. Standard Errors of Estimated Number of Persons Below the Poverty Level in the 10 Federal Regions

(68 chances out of 100. Numbers in thousands)

Size of estimate	Standard errors by Federal region number									
	I	II	III	IV	V	VI	VII	VIII	IX	X

50,000	(X)	(X)	(X)	4,200	5,000	(X)	(X)	(X)	(X)	(X)

X Not applicable.

Note: To estimate standard errors for persons in the 10 Federal regions at all income levels divide these standard errors by 2.0.

Table A-7. Standard Errors of Estimated Percentages of Persons Below the Poverty Level: 1966 through 1975

(68 chances out of 100)

Base of estimated percentage (thousands)	Estimated percentage				
	2 or 98	5 or 95	10 or 90	25 or 75	50
100	3.5	5.4	7.4	10.7	12.4
250	2.2	3.4	4.7	6.8	7.8
500	1.6	2.4	3.3	4.8	5.5
1,000	1.1	1.7	2.3	3.4	3.9
2,500	0.7	1.1	1.5	2.1	2.5
5,000	0.5	0.8	1.1	1.5	1.8
10,000	0.3	0.5	0.7	1.1	1.2
25,000	0.2	0.3	0.5	0.7	0.8
50,000	0.2	0.2	0.3	0.5	0.6
100,000	0.1	0.2	0.2	0.3	0.4

Note: To estimate standard errors for persons at all income levels, divide these standard errors by 2.0. See table A-11 for factors to be applied to the standard errors for other characteristics and table A-12 for factors for the years 1959 through 1965.

Illustration of the use of standard error tables. Table B of this report shows that in 1975 there were 25,877,000 persons below the poverty level. Table A-4 shows the standard error of an estimate of this size to be approximately 371,000. In this situtation no factors have to be applied to the standard error; i.e., both f_1 and f_2 are equal to 1. Alternatively, using the parameters in table A-13 in formula (2) gives a standard error of

$$373{,}000 = \sqrt{(-.000029)\ (25{,}877{,}000)^2 + (6133.9944)\ (25{,}877{,}000)}$$

as shown in table B.

The chances are 68 out of 100 that the estimate would have been a figure differing from a complete census figure by less than 373,000. The chances are 95 out of 100 that the estimate would have differed from a complete census figure by less than 746,000 (twice the standard error).

Of these 25,877,000 persons below the poverty level, 7,545,000 or 29.2 percent were black. Table A-7 shows the standard error of 29.2 percent on a base of 25,877,000 to be approximately 0.7 percent.

Alternatively, this standard error could have been derived by using the "b" parameter for blacks from Table A-13 in formula (4).

$$0.7 = \sqrt{\left(\frac{5539.3864}{25{,}877{,}000}\right)(29.2)\ (70.8)}$$

Consequently, chances are 68 out of 100 that the estimated 29.2 percent would be within 0.7 percentage points of a complete census figure, and 95 out of 100 that the estimate would be within 1.4 percentage points of a complete census figure, i.e., this 95 percent confidence interval would be from 27.8 to 30.6 percent.

Standard error of a difference. The formula for approximate standard errors of the difference between two estimates is given by (5):

$$\sigma_\triangle = \sqrt{\sigma^2{}_1 + \sigma^2{}_2 - 2\rho\sigma_1\ \sigma_2} \qquad (5)$$

The estimates can be of numbers, percents, ratios, etc. σ_1 and σ_2 are the standard errors presented in Tables A-4 through A-10. The correlation coefficient ρ can be determined from table A-17 for year-to-year comparisons for poverty estimates and pro-

Table A-8. Standard Errors of Estimated Percentages for Families and Unrelated Individuals: 1966 through 1975

(68 chances out of 100)

Base of estimated percentage (thousands)	Estimated percentage				
	2 or 98	5 or 95	10 or 90	25 or 75	50
100	1.4	2.2	3.1	4.5	5.2
250	0.9	1.4	2.0	2.8	3.3
500	0.6	1.0	1.4	2.0	2.3
1,000	0.5	0.7	1.0	1.4	1.6
2,500	0.3	0.4	0.6	0.9	1.0
5,000	0.2	0.3	0.4	0.6	0.7
10,000	0.14	0.2	0.3	0.4	0.5
25,000	0.09	0.14	0.2	0.3	0.3
50,000	0.06	0.10	0.14	0.2	0.2

Note: See table A-11 for factors to be applied to the standard errors for other characteristics and table A-12 for factors for the years 1959 through 1965.

portions; for other comparisons assume that ρ equals zero. Making this assumption will result in accurate estimates of standard errors for the difference between two estimates of the same characteristic in two different areas, or for the difference between separate and uncorrelated characteristics in the same area. If, however, there is a high positive correlation between the two characteristics, the formula will overstate the true standard error.

Illustration of the computation of the standard error of a difference in estimates. Table A shows that the number of persons below the poverty level in 1975 was 25,877,000 and in 1974 the figure was 23,370,000. The apparent difference is 2,507,000. As shown above, the standard error on the 25,877,000 persons below the poverty level is 373,000. The standard error on the 23,370,000 low-income persons computed from (2) is 357,000. The correlation coefficient, ρ, is equal to 0.4. The standard error of the estimated difference of 2,507,000 is about

$$400{,}000 = \sqrt{(373{,}000)^2 + (357{,}000)^2 - 2(0.4)\ (373{,}000)\ (357{,}000)}$$

This means the chances are 68 out of 100 that the estimated difference based on the samples would differ from the difference derived using complete census figures by less than 400,000. The 68 percent confidence interval around the 2,507,000 difference is from 2,107,000 to 2,907,000, i.e., 2,507,000 ± 400,000. A conclusion that the average estimate of the difference derived from all possible samples lies within a range computed in this way would be correct for roughly 68 percent of all possible samples. The 95 percent confidence interval is 1,707,000 to 3,307,000. We can conclude with 95 percent confidence that the number of persons below the poverty level in 1975 is actually larger than the number of persons below the poverty level in 1974, i.e., the confidence interval does not include zero.

Ratios. A ratio of two numbers can be expressed as a mean for the purposes of computing an approximate standard error. In the case where either the numerator or denominator of the ratio is income, formula (6) for the standard error of the arithmetic mean should be used. In the case where the ratio has persons in the numerator and families in the denominator, formula (7) with the appropriate ρ will give a preferable result to that of formula (6).

Table A-9. Standard Errors of Estimated Percentages of Persons Below the Poverty Level in Federal Regions I to VII, and IX

(68 chances out of 100)

Base of estimated percentage (thousands)	Estimated percentage					
	1 or 99	2 or 98	5 or 95	10 or 90	25 or 75	50
100	5.4	7.6	11.9	16.3	23.6	27.2
250	3.4	4.8	7.5	10.3	14.9	17.2
500	2.4	3.4	5.3	7.3	10.5	12.2
1,000	1.7	2.4	3.8	5.2	7.5	8.6
2,500	1.1	1.5	2.4	3.3	4.7	5.4
5,000	0.8	1.1	1.7	2.3	3.3	3.8
10,000	0.5	0.8	1.2	1.6	2.4	2.7
25,000	0.3	0.5	0.8	1.0	1.5	1.7
50,000	0.2	0.3	0.5	0.7	1.1	1.2

Note: For Regions I and II, multiply standard errors by 0.70; for Regions III, IV, and IX, multiply standard errors by 0.85; for Region V, multiply standard errors by 0.80; for Region VI, multiply standard errors by .95 and for Region VII, multiply standard errors by 1.00.

Table A-10. Standard Errors of Estimated Percentages of Persons Below the Poverty Level in Federal Regions VIII and X

(68 chances out of 100)

Base of estimated percentage (thousands)	Estimated percentage					
	1 or 99	2 or 98	5 or 95	10 or 90	25 or 75	50
100	8.0	11.2	17.5	24.1	34.8	40.2
250	5.1	7.1	11.1	15.2	22.0	25.4
500	3.6	5.0	7.8	10.8	15.6	18.0
1,000	2.5	3.6	5.5	7.6	11.0	12.7
2,500	1.6	2.2	3.5	4.8	7.0	8.0
5,000	1.1	1.6	2.5	3.4	4.9	5.7
10,000	0.8	1.1	1.8	2.4	3.5	4.0
25,000	0.5	0.7	1.1	1.5	2.2	2.5
50,000	0.4	0.5	0.8	1.1	1.6	1.8

Note: For Region VIII, multiply standard errors by 1.00; for Region X, multiply standard errors by 0.80.

Table A-11. Factors to be Applied to Generalized Standard Errors in Tables A-4, A-5, A-7, and A-8 for Family Characteristics and for Persons and Families by Region

Characteristic	Factor (f_1)		Characteristic	Factor (f_1)
	Tables A-4 -7, and -8	Table A-5		Tables A-4 -7, and -8
Families by:			Persons and families by:	
Age of head	1.1	1.2	Region[1]:	
Employment status of head	1.0	1.0	North and West	1.1
Work experience of head	1.0	1.0	Northeast	1.1
Number of related children	1.1	1.2	North Central	1.2
Size of family	1.1	1.2	West	1.1
Number of workers	1.0	1.0	South	1.2
Educational attainment of head	1.2	1.4	Farm[1]	1.4
			Nonfarm[1]	1.0
			Spanish origin	1.2

[1] Standard errors for persons and families by region and farm-nonfarm residence do not vary by race; therefore for "Black and other races" data by region, use tables A-4, -7, or -8 and the appropriate factors shown above.

Table A-12. Factors to be Applied to all Standard Errors for 1959 through 1965

Year	Source of data	Factor (f_2)
1959	1-in-1,000 Sample of 1960 census	0.6
1959 to 1964	CPS	1.4
1965	CPS	1.2

Computation of the standard error of an arithmetic mean. To get a rough estimate of the standard error of a mean, the following formula can be used:

$$\sigma_{\bar{x}} = \sqrt{\frac{b}{y}\left[\sum_{i=1}^{c} p_i x_i^{2} - \bar{x}^{2}\right]} \qquad (6)$$

In this formula, y is the size of the base, p_i are the percentages of total cases in the i classes, x_i are the midpoints of the i classes (or discrete values of the i classes).[2]

The mean value, $\bar{x}$, is defined by $\sum_{i=1}^{c} p_i x_i$

The parameter b is the parameter from tables A-13 to A-16 corresponding to the characteristic of interest.

Standard error of a ratio. Certain mean values, for persons in families, listed in the tables of this report were not calculated using the formula for x given above. Rather, they were calculated as the ratio of two numbers. For example, the mean number of children per family with children is calculated as

$$\frac{x}{y} = \frac{\text{total number of children in families}}{\text{total number of families with children}}$$

Standard errors for these means may be approximated as shown below from the standard error tables or by using formula (2) and the parameters from Tables A-13 and -14. There are two cases to consider. In either case, the denominator y represents a count of families of a certain class, and the numerator x represents a count of persons with the characteristic under consideration who are members of these families.

---

[2] For income tables, use -$5,000 as the midpoint for "Loss" and $8,500 as the midpoint for "$8,000 or more." For the income deficit table, use $6,000 as the midpoint of the "$5,000 or more" interval and $2,250 as the midpoint of the "$1,500 or more" interval.

Table A-13. Parameters for Estimated Numbers and Percentages of Persons by Poverty Status, Age, Sex, Race, and Spanish Origin: 1966 through 1975

Parameter and characteristic	Below poverty level			All income levels		
	All races and White	Black and other races	Spanish origin	All races and White	Black and other races	Spanish origin
"b" Parameter	6133.9944	5539.3864	8917.4236	1533.4986	1384.8466	2229.3559

Male	-.000060	-.000426	-.000087	-.000015	-.000107	-.000022
Female	-.000056	-.000377	-.000081	-.000014	-.000094	-.000020

[1] Use these parameters for work experience and employment status data for persons.

Note: See table A-12 for factors to be applied to standard errors for the years 1959 through 1965.

Case 1: There is at least one person having the characteristic in every family of the class; as for example, the mean number of children per family with children. For ratios of this kind, the standard error is approximated by the following formula:

$$\sigma_{\frac{x}{y}} = \sqrt{\left(\frac{x}{y}\right)^2 \left[\left(\frac{\sigma_y}{y}\right)^2 + \left(\frac{\sigma_x}{x}\right)^2 - 2\rho \left(\frac{\sigma_x}{x}\right)\left(\frac{\sigma_y}{y}\right)\right]}$$

The standard error of the estimated number of families, σ_y, and the standard error of the estimated number of persons with the characteristic, σ_x, may be obtained from Table A-4 or A-5. Alternatively, formula (2) and Tables A-13 and A-14 may be used. In formula (7), ρ represents the correlation coefficient between the numerator and the denominator of the estimate. In the above example, and for other ratios of this kind, use 0.7 as an estimate of ρ. This procedure can also be used to compute the standard error on the estimate of mean family size where

$$\frac{x}{y} = \frac{\text{total number of persons in families}}{\text{total number of families}}$$

and ρ is again estimated to be approximately 0.7.

Case 2: The number of persons having the characteristic in a given family may be 0, 1, 2, 3, or more; for example, the mean number of children per family. For ratios of this kind the standard error is approximated by formula (7) but ρ is assumed to be zero. If ρ is actually positive, then this procedure will provide an overestimate of the standard error of the ratio.

Sampling variability of a median. The sampling variability of an estimated median depends upon the form of the distribution as well as the size of its base. An approximate method for measuring the reliability of a median is to determine an interval about the estimated median, such that there is a stated degree of confidence that the median based on a complete census lies within the interval. The following procedure may be used to estimate the 68 percent confidence limits of a median based on sample data:

1. Determine, using the standard error tables or formula (4), the standard error of a 50 percent characteristic, using the appropriate base.
2. Add to and subtract from 50 percent the standard error determined in step (1).
3. Using the distribution of the characteristic, read off the confidence interval corresponding to the two points established in step (2).

A 95 percent confidence interval may be determined by finding the values corresponding to 50 percent plus and minus twice the standard error determined in step (1).

Illustration of the computation of a confidence interval for a median. Using estimates from table 39 it can be shown that the median income deficit for poor male-headed families was $1,359 in 1975. The size, or base, of the distribution from which this median was determined is 3,020,000.

1. Table A-8 shows that the standard error of an estimate of 50 percent on a base of 3,020,000 is about 0.9 percent.
2. To obtain a two standard error confidence interval on the estimated median, initially add to and subtract from 50 percent twice the standard error found in step (1). This yields percentage limits of 48.2 and 51.8.
3. Since 40.1 percent of these families had income deficits below $1,000 and 13.7 percent had income deficits between $1,000 and $1,499, the dollar value of the lower limit may be found by linear interpolation to be:

$$\$1{,}000 + \$500 \times \left[\frac{48.2 - 40.1}{13.7}\right] = \$1{,}296$$

Similarly, the upper limit may be found by linear interpolation to be about:

$$\$1{,}000 + \$500 \times \left[\frac{51.8 - 40.1}{13.7}\right] = \$1{,}427$$

Thus, an approximate 95 percent confidence interval is from $1,296 to $1,427.

Table A-14. Parameters for Estimated Numbers and Percentages of Families or Unrelated Individuals by Race and Spanish Origin: 1966 through 1975

Characteristic	All races and White		Black and other races		Spanish origin	
	a	b	a	b	a	b
Total families or unrelated individuals	-.000008	1063.1809	-.000064	922.0689	-.000020	1422.2069

Employment status of head	-.000008	1063.1809	-.000064	922.0689	(X)	(X)
Work experience of head	-.000008	1063.1809	-.000064	922.0689	-.000020	1422.2069
Number of related children under 18 years	-.000010	1388.6444	-.000087	1255.0382	-.000020	1422.2069
Size of family	-.000010	1388.6444	-.000087	1255.0382	-.000020	1422.2069
Number of workers	-.000008	1063.1809	-.000064	922.0689	-.000020	1422.2069
Educational attainment of head	-.000011	1431.2189	-.000123	1858.8439	-.000020	1422.2069

X Not applicable.

Note: These parameters can be used to estimate standard errors for families at all income levels. See table A-12 for factors to be applied to standard errors for the years 1959 through 1965.

Table A-15. Parameters for Estimated Numbers and Percentages of Persons Below the Poverty Level in the 10 Federal Regions

Parameter	Region I (Boston)	Region II (New York)	Region III (Philadelphia)	Region IV (Atlanta)	Region V (Chicago)
a	0.034561	0.014617	0.017573	0.006710	0.009527
b	14,168.9666	15,586.1130	22,296.1091	21,322.6729	18,109.1707

Parameter	Region VI (Dallas-Ft. Worth)	Region VII (Kansas City)	Region VIII (Denver)	Region IX (San Francisco)	Region X (Seattle)
a	0.014312	0.044507	0.192584	0.019675	0.131217
b	27,624.8572	29,607.5149	64,494.4888	21,407.5747	41,684.010

Note: To estimate standard errors for all persons in the 10 Federal Regions divide the parameters by 4 and use the appropriate formulas given in the text.

Table A-16. Parameters for Estimated Numbers and Percentages of Persons and Families Below the Poverty Level by Region and Farm-Nonfarm Residence: 1966 through 1975

Region	Persons		Families and unrelated individuals	
	a	b	a	b
North and West	0.001456	7694.0316	0.000252	1333.5759
Northeast	0.003222	7047.7892	0.000559	1221.5653
North Central	0.002657	8700.6564	0.000461	1508.0502
West	0.004471	7227.0616	0.000775	1252.6379
South	0.002189	8676.7140	0.003794	1503.9003
Farm	0.000824	11715.8000	0.000143	2030.6775
Nonfarm	-0.000029	6133.9944	-0.000008	1063.1809

Note: To estimate standard errors for persons at all income levels divide the parameters by 4 and use the appropriate formulas given in the text. For families and unrelated individuals at all income levels, use the same parameters that are shown in this table for families and unrelated individuals below the poverty level. See table A-12 for factors to be applied to standard errors for the years 1959 through 1965.

Table A-17. Year-to-Year Correlation Coefficients for Poverty Estimates

(Numbers and proportions)

Characteristic	1974-1975[1]		1971-1972		1970-1971	
	Persons	Families	Persons	Families	Persons	Families
Total	0.40	0.35	0.15	0.14	0.31	0.28
White	0.35	0.30	0.14	0.13	0.28	0.25
Black	0.45	0.40	0.17	0.16	0.35	0.32
Other races	0.45	0.40	0.17	0.16	0.35	0.32
Spanish origin	0.45	0.40	0.17	0.16	0.35	0.32

[1] These correlation coefficients are also applicable to 1973-1974, 1972-1973, 1969-1970 and earlier years.

APPENDIX B

OEO Table 1 AGE OF PERSON AND FAMILY RELATIONSHIP BY AGE AND SEX OF HEAD

Age of person and relationship to head	Total	In families								Unrelated individuals
		Total	Age of head (years)							
			14 to 21	22 to 34	35 to 44	45 to 54	55 to 59	60 to 64	65 and over	
All Persons

18 and 19 years										
20 and 21 years										
Other female										
16 and 17 years										
18 and 19 years										
20 and 21 years										
22 to 44 years										
Head										
Wife										
Other male										
Other female										
Same as 22 to 44 years for:										
45 to 54 years										
55 to 59 years										
60 to 64 years										
65 years and over										

Same as "All Persons" for:
- Persons in Families With Male Head and Male Unrelated Individuals
- Persons in Families With Female Head and Female Unrelated Individuals

All of the above for:
- Below Poverty Level
- Percent Below Poverty Level
- Between 100 and 125 Percent of the Poverty Level
- Between 125 and 150 Percent of the Poverty Level

All of the above for:
- White
- Black
- Spanish Origin

Tabulation areas:
- Nonfarm
- Farm

- Metropolitan Areas
  - Inside Central Cities
  - Outside Central Cities
- Nonmetropolitan Areas

- 10 Federal Regions

OEO Table 2. EDUCATIONAL ATTAINMENT OF PERSONS BY AGE AND FAMILY RELATIONSHIP

Years of school completed and family relationship	Total	Age (years)								
		14 and 15	16 and 17	18 to 21	22 to 34	35 to 44	45 to 54	55 to 59	60 to 64	65 and over
Both Sexes										
Total										
No years of school completed										
Elementary: 1 to 5 years										
6 to 7 years										
8 years										
High school: 1 to 3 years										
4 years										
College (1 year or more)										
Median years of school completed										
Percent not a high school graduate										

Same as "Total" block for:
- Family heads
- Wives
- Other family members
- Unrelated individuals

Same as "Both Sexes" for:
- Male
- Female

All of the above for:
- Below Poverty Level
- Percent Below Poverty Level
- Between 100 and 125 Percent of the Poverty Level

All of the above for:
- White
- Black

OEO Table 3. WORK EXPERIENCE OF PERSONS BY AGE AND FAMILY RELATIONSHIP

Work experience and family relationship	Total	Age (years)							
		14 and 15	16 to 21	22 to 34	35 to 44	45 to 54	55 to 59	60 to 64	65 and over
Both Sexes									
Total									
Worked full time									
50 to 52 weeks									
40 to 49 weeks									
27 to 39 weeks									
26 weeks or less									
Worked part time									
50 to 52 weeks									
40 to 49 weeks									
27 to 39 weeks									
26 weeks or less									
Worked less than 50 weeks-- Main reason for working part year:									
Ill or disabled									
Keeping house									
Unable to find work									
Other									
Worked less than 50 weeks--Number of weeks unemployed:									
1 to 4 weeks									
5 to 14 weeks									
15 to 26 weeks									
27 weeks or more									
Did not work last year									
Main reason for not working:									
Ill or disabled									
Keeping house									
Going to school									
Unable to find work									
Retired									
Other									
In Armed Forces									

Same as "Total" block for:
Family heads
Wives
Other family members
Unrelated individuals

Same as "Both Sexes" for:
Male
Female

All of the above for:
Same Poverty Level and Race repeats as OEO Table 2

OEO Table 4. OCCUPATION OF LONGEST JOB OF PERSONS BY AGE

Occupation of longest job	Total	Age (years)							
		14 and 15	16 to 21	22 to 34	35 to 44	45 to 54	55 to 59	60 to 64	65 and over
Both Sexes									
Worked last year, total									
Wage and salary workers, incl. gov't									
Professional and managerial									
Clerical and sales									
Crafts and kindred workers									
Operatives, including transport									
Laborers, except farm									
Farmers and farm managers									
Farm laborers and supervisors									
Private household workers									
Service workers, exc. private household									
Self-employed, farm									
Self-employed, other									
Unpaid family workers									

Same as "Total" block for:
Family heads
Wives
Other family members
Unrelated individuals

Same as "Both Sexes" for:
Male
Female

All of the above for:
Same Poverty Level and Race repeats as OEO Table 2

OEO Table 5. INDUSTRY OF LONGEST JOB OF PERSONS BY FAMILY RELATIONSHIP

Industry of longest job and family relationship	Total	Age (years)						
		14 and 15	16 to 21	22 to 34	35 to 44	45 to 54	55 to 64	65 and over
Both Sexes								
Worked last year, total

VACATION REMINDER

Next month, during the week of the 19th we will again be calling on you. Is there any reason why we would not be able to contact you here?

16. LIVING QUARTERS (indicate type, access and kitchen facilities)

16a. HOUSING UNIT
- ☐ House, apartment, flat
- ☐ HU in nontrans. hotel, motel, etc.
- ☐ HU-perm. in trans. hotel, motel, etc.
- ☐ HU in rooming house
- ☐ Mobile home or trailer
- ☐ HU not specified above *(Describe in notes)*

16b. ACCESS ☐ Direct ☐ Thru another unit

16c. COMPLETE KITCHEN FACILITIES
- ☐ For this unit only
- ☐ Also used by another household
- ☐ None

If "NONE," and unit vacant, did last occupants have complete kitchen facilities?
- ☐ For this unit only
- ☐ Also used by another household
- ☐ None

16d. OTHER UNIT
- ☐ Quarters not HU in rooming or boarding house
- ☐ Unit not permanent in transient hotel, motel, etc.
- ☐ Vacant tent site or trailer site
- ☐ Not specified above *(Describe in notes)*

NOTES

30. USE OF TELEPHONE

30a. **What is your telephone number?**		30b. **Is a telephone interview acceptable?**
1st month	No. _____ No phone ☐	1st month Y N
5th month	No phone ☐ Same ☐ No. _____	5th month Y N

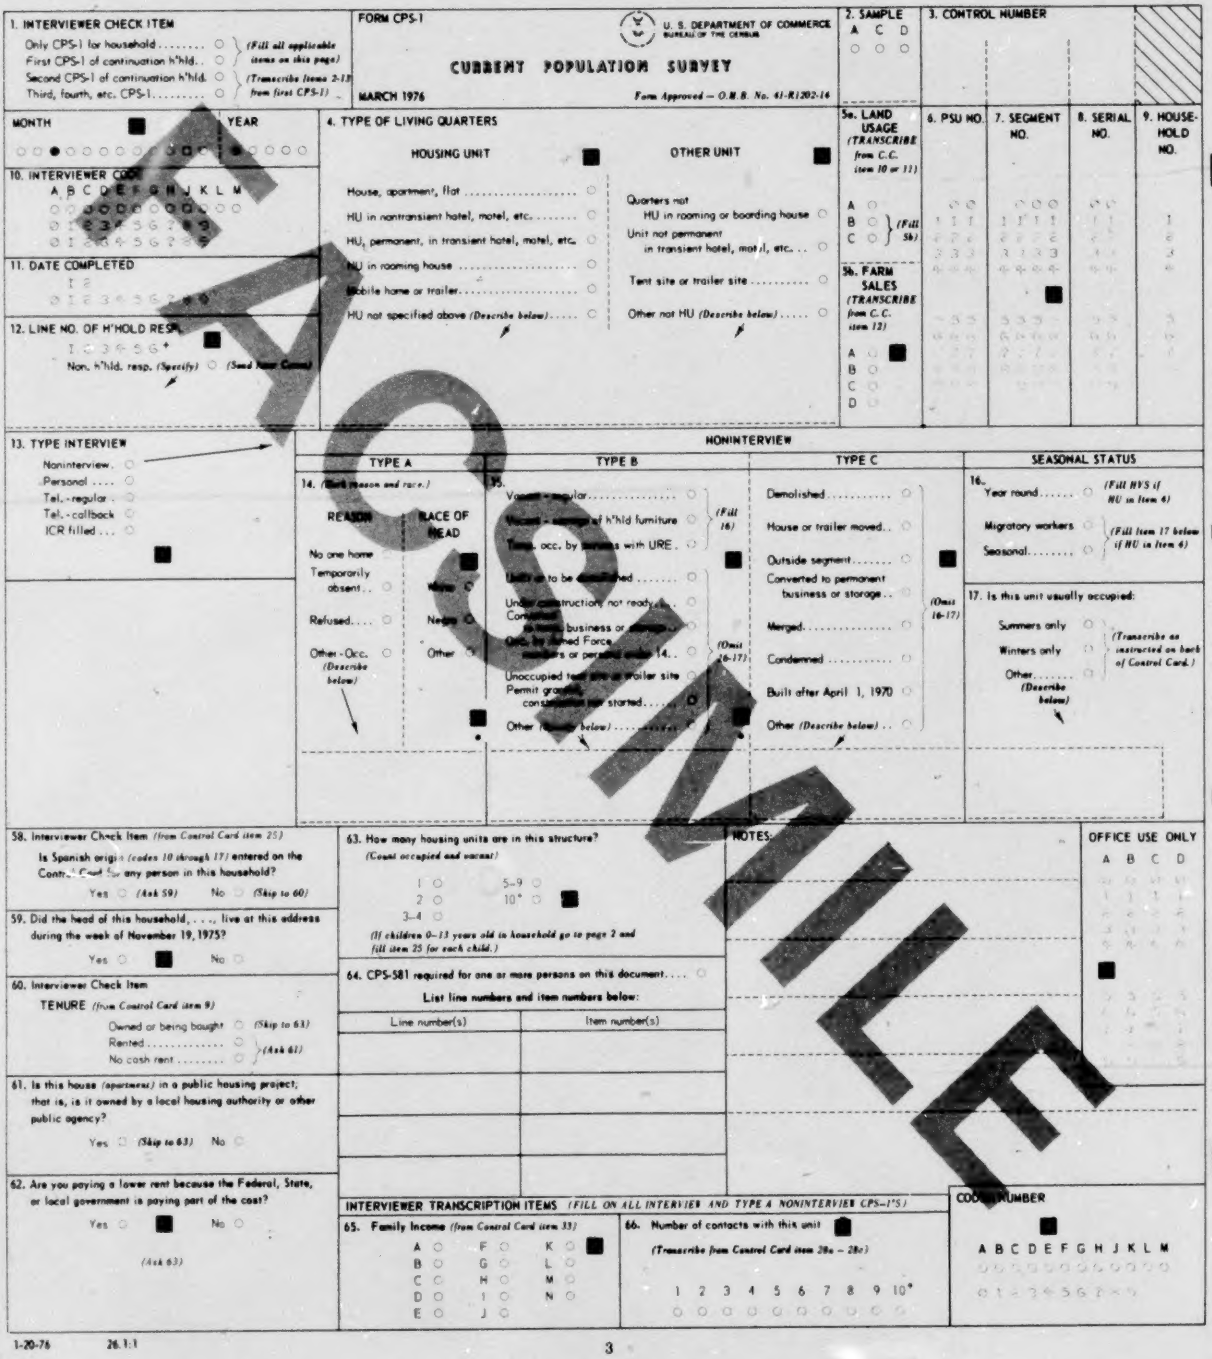
31. **What is the best time to call or visit?**

33. TOTAL FAMILY INCOME IN PAST 12 MONTHS

Which category on this card represents the total income for this family in the past 12 months? This includes wages and salaries, net income from business or farm, pensions, dividends, interest, rent, Social Security payments, and any other money income received by the members of this family. *(Show flashcard) (Include related family members 14+yr.)*

A ☐ Under $1,000	F ☐ $ 5,000 to $ 5,999	J ☐ $12,000 to $14,999
B ☐ $1,000 to $1,999	G ☐ 6,000 to 7,499	K ☐ 15,000 to 19,999
C ☐ 2,000 to 2,999	H ☐ 7,500 to 9,999	L ☐ 20,000 to 24,999
D ☐ 3,000 to 3,999	I ☐ 10,000 to 11,999	M ☐ 25,000 to 49,999
E ☐ 4,000 to 4,999		N ☐ 50,000 and over

Facsimile for the March 1976 CPS Questionnaire—Continued



FACSIMILE

18. LINE NUMBER

19. What was . . . doing most of LAST WEEK –
Working
Keeping house
Going to school
or something else?

- Working *(Skip to 20A)* . . . . . WK ○
- With a job but not at work . . J ○
- Looking for work . . . . LK
- Keeping house . . . . H
- Going to school . . . . S
- Unable to work *(Skip to 24)* . U
- Retired . . . . R ○
- Other *(Specify)* . . . . OT ○

20C. Does . . . USUALLY work 35 hours or more a week at this job?
Yes — What is the reason . . . worked less than 35 hours LAST WEEK?
No — What is the reason . . . USUALLY works less than 35 hours a week?
(Mark the appropriate reason)

- Slack work . . . .
- Material shortage . . . .
- Plant or machine repair . . . . .
- New job started during week . .
- Job terminated during week . . .
- Could find only part-time work
- Holiday *(Legal or religious)* . . .
- Labor dispute . . . .
- Bad weather . . . .
- Own illness . . . .
- On vacation . . . .
- Too busy with housework, school, personal bus., etc.
- Did not want full-time work . . .
- Full-time work week under 35 hours
- Other reason *(Specify)* . . . . . .

(Skip to 23 and enter job worked at last week)

20. Did . . . do any work at all LAST WEEK, not counting work around the house? *(Note: If farm or business operator in hh., ask about unpaid work)*
Yes ○ No ○ *(Go to 21)*

20A. How many hours did . . . work LAST WEEK at all jobs?

20B. INTERVIEWER CHECK ITEM
49+ *(Skip to item 23)*
1-34 ○ *(Go to 20C)*
35-48 *(Go to 20D)*

20D. Did . . . lose any time or take any time off LAST WEEK for any reason such as illness, holiday or slack work?
Yes — How many hours did . . . take off?
(Correct 20A if lost time not already deducted; if 20A reduced below 35, correct 20B and fill 20C, otherwise, skip to 23.)
No

20E. Did . . . work any overtime or at more than one job LAST WEEK?
Yes — How many extra hours did . . . work?
(Correct 20A and 20B as necessary if extra hours not already included and skip to 23.)
No
(Skip to 23)

21. *(If J in 19, skip to 21A.)* **Did . . . have a job or business from which he was temporarily absent or on layoff LAST WEEK?**
Yes ○ No ○ *(Go to 22)*

21A. Why was . . . absent from work LAST WEEK?

- Own illness . . . . ○
- On vacation . . . .
- Bad weather . . . .
- Labor dispute . .
- New job to begin within 30 days — *(Skip to 22B and 22C2)*
- Temporary layoff *(Under 30 days)* — *(Skip to 22C3)*
- Indefinite layoff *(30 days or more or no def. recall date)* — *(Skip to 22C3)*
- Other *(Specify)* . . ○

21B. Is . . . getting wages or salary for any of the time off LAST WEEK?
Yes . . . .
No . . . . ○
Self-employed ○

21C. Does . . . usually work 35 hours or more a week at this job?
Yes ○
No ○
(Skip to 23 and enter job held last week)

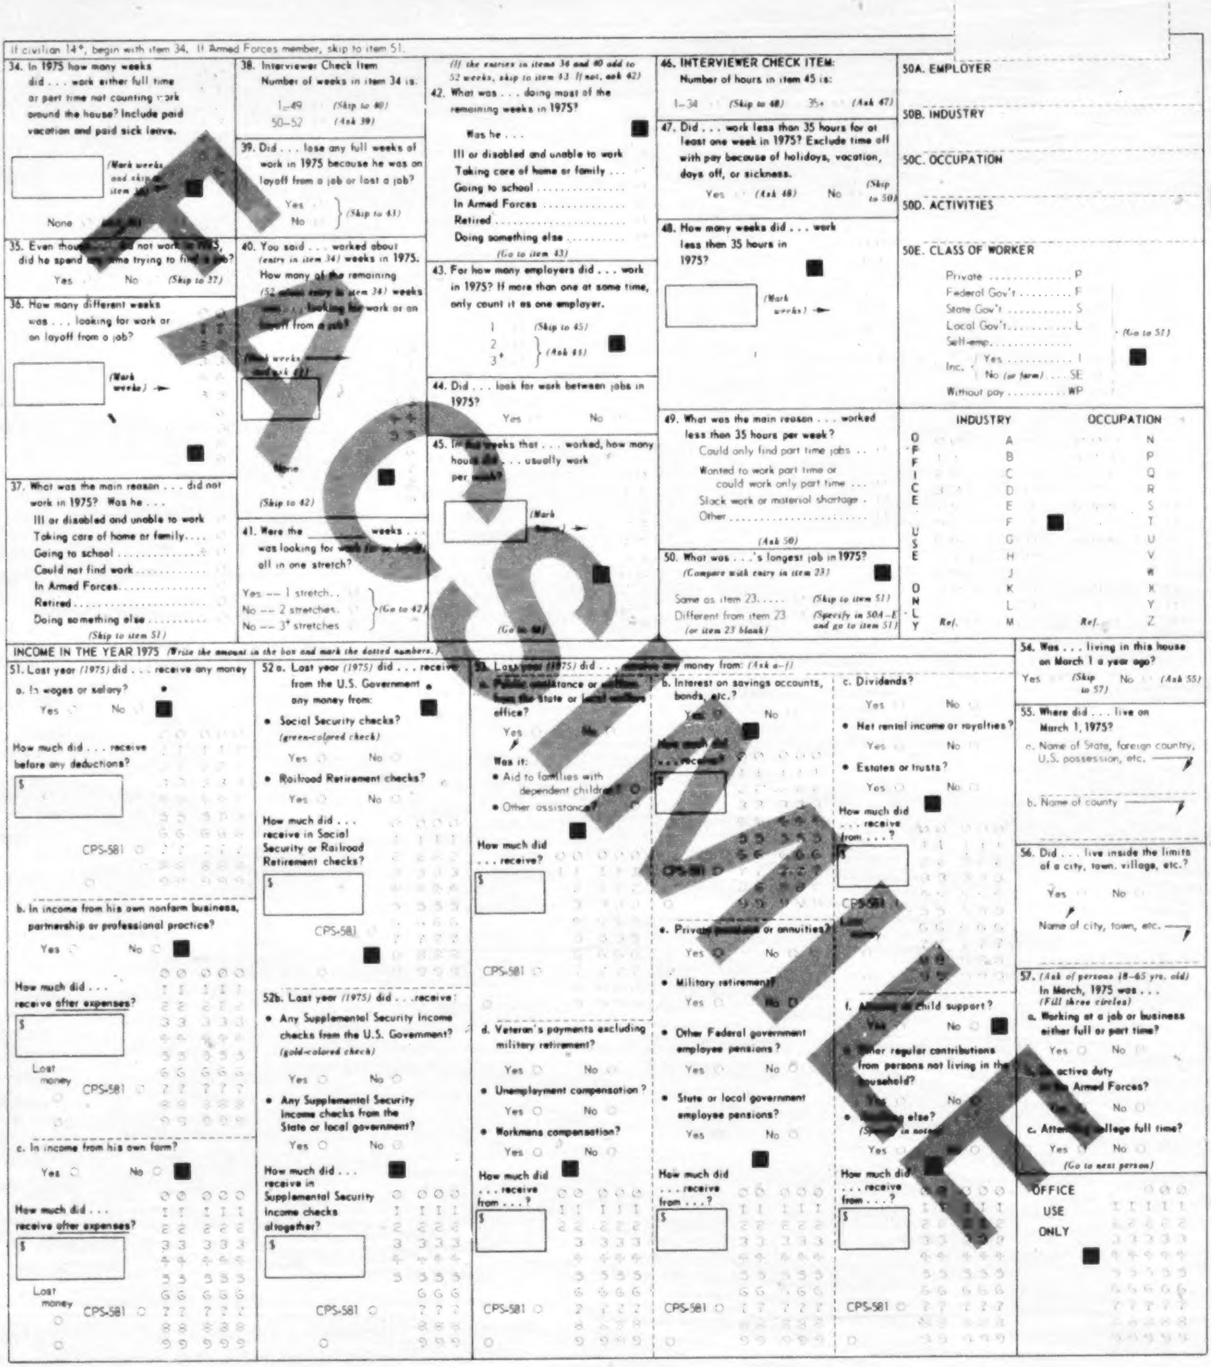
Facsimile for the March 1976 CPS Questionnaire—Continued



FACSIMILE

If civilian 14+, begin with item 34. If Armed Forces member, skip to item 51.

34. In 1975 how many weeks did . . . work either full time or part time not counting work around the house? Include paid vacation and paid sick leave.

(Mark weeks and skip to item 38) ☐

None ○ *(Ask 35)*

35. Even though he did not work in 1975, did he spend any time trying to find a job?

Yes ○ No ○ *(Skip to 37)*

36. How many different weeks was . . . looking for work or on layoff from a job?

☐ *(Mark weeks)* →

37. What was the main reason . . . did not work in 1975? Was he . . .

- Ill or disabled and unable to work ○
- Taking care of home or family ○
- Going to school ○
- Could not find work ○
- In Armed Forces ○
- Retired ○
- Doing something else ○

(Skip to item 51)

38. Interviewer Check Item
Number of weeks in item 34 is:

1–49 ○ *(Skip to 40)*
50–52 ○ *(Ask 39)*

39. Did . . . lose any full weeks of work in 1975 because he was on layoff from a job or lost a job?

Yes ○
No ○ } *(Skip to 43)*

40. You said . . . worked about *(entry in item 34)* **weeks in 1975. How many of the remaining** *(52 minus entry in item 34)* **weeks was . . . looking for work or on layoff from a job?**

(Mark weeks and ask 41) ☐

None ○

(Skip to 42)

41. Were the _______ weeks . . . was looking for work (or on layoff) all in one stretch?

Yes — 1 stretch ○
No — 2 stretches ○
No — 3+ stretches ○ } *(Go to 42)*

(If the entries in items 34 and 40 add to 52 weeks, skip to item 43. If not, ask 42)

42. What was . . . doing most of the remaining weeks in 1975?

Was he . . .

- Ill or disabled and unable to work ○
- Taking care of home or family ○
- Going to school ○
- In Armed Forces ○
- Retired ○
- Doing something else ○

(Go to item 43)

43. For how many employers did . . . work in 1975? If more than one at same time, only count it as one employer.

1 ○ *(Skip to 45)*
2 ○
3+ ○ } *(Ask 44)*

44. Did . . . look for work between jobs in 1975?

Yes ○ No ○

45. In the weeks that . . . worked, how many hours did . . . usually work per week?

☐ *(Mark hours)* →

(Go to 46)

46. INTERVIEWER CHECK ITEM:
Number of hours in item 45 is:

1–34 ○ *(Skip to 48)* 35+ ○ *(Ask 47)*

47. Did . . . work less than 35 hours for at least one week in 1975? Exclude time off with pay because of holidays, vacation, days off, or sickness.

Yes ○ *(Ask 48)* No ○ *(Skip to 50A)*

48. How many weeks did . . . work less than 35 hours in 1975?

☐ *(Mark weeks)* →

49. What was the main reason . . . worked less than 35 hours per week?

- Could only find part time jobs ○
- Wanted to work part time or could work only part time ○
- Slack work or material shortage ○
- Other ○

(Ask 50)

50. What was . . .'s longest job in 1975?
(Compare with entry in item 23)

Same as item 23 ○ *(Skip to item 51)*
Different from item 23 (or item 23 blank) ○ *(Specify in 50A–E and go to item 51)*
